## STATE STATISTICS SERVICE OF UKRAINE

Edited by **Ihor Verner**

Responsible for edition is Olena Vyshnevskva

The Statistical Yearbook provides data on social and economic situation of Ukraine in 2021 as compared to the previous years. The Yearbook highlights the indicators of the national accounts system, material production, financial and social spheres, population, and statistical indicators of selected countries. Designed for a wide range of users.

## FOREWORD

*Statistical Yearbook of Ukraine for 2021* contains a wide range of statistical indicators on the country's social and economic situation in 2021 as compared to 2000, 2005, 2010, 2015–2020.

The publication is compiled by the following sections: population and migration, labour market, income and living conditions, communities and housing, education, health care and social protection, culture, leisure, sport and tourism, justice and crime, environment and natural resources, national accounts, government finance and credit, prices, Register of statistical units, capital assets, energy, industry, agriculture, hunting, forestry, fishery, construction, capital investment, transport, foreign economic activity, domestic trade, information society, activity of enterprises, science and innovations.

In addition, the publication has a separate section, which compares the basic indicators of Ukraine's social and economic development with indicators of selected countries.

Statistical indicators are broken down by type of economic activity, type of product, organisational form as well as region. Some indicators are retrospective. Almost all sections have methodological explanations.

In the publication, the information based on the results of the state statistical observations (absolute and relative indicators) for 2014–2021 is presented and compiled excluding the temporarily occupied territory of the Autonomous Republic of Crimea, the city of Sevastopol and a part of the temporarily occupied territories in the Donetsk and Luhansk regions. At the same time, the comparability of relative indicators is ensured. Information for 2021 which is prepared according to data from central executive bodies has been compiled on the basis of available administrative data.

Data are given by enterprises, institutions and organizations that submitted their reporting to the state statistics bodies. Information by Selected general economic and sector indicators for 2021 will be released after the end of timing for submission of statistical and financial reporting set by Ukraine's law *On protection of interests of entities that submit reporting and other documents during the period of martial law or state of war*.

Some indicators for the previous years have been revised as to those previously published.

The methodology for indicators compilation meets international and European standards, this ensures the possibility to compare them with other countries.

Please note that the SSSU official website ([www.ukrstat.gov.ua](http://www.ukrstat.gov.ua)) has more information about the country's social and economic situation.

## ABBREVIATIONS USED IN THE YEARBOOK

bln.– billion	kV·A – kilovolt-ampere	% – percent
centner (100 kg)	kW – kilowatt	pcs – pieces
cub.m – cubic metre	kW·h – kilowatt-hour	sq.km – square kilometre
dal – dekalitre	L – litre	sq.m – square metre
etc – et cetera	Mcal – mega-calorie	t – tonne
Gcal – giga-calorie	Mpa – mega-pascal	t N – tonne nitrogen
g – gramme	m – metre	thsd. – thousand
h – hour	mg – milligram	tkm – tonne-kilometre
ha – hectare	mm – millimetre	trln. – trillion
kg – kilogramme	mln. – million	UAH – Ukrainian hryvnya
kcal – kilo-calorie	µg – microgramme	USD – dollar of USA
km – kilometre	n.i.e. – not included elsewhere	
KRB – karbovanets	n.e.c. – non elsewhere classified	

## CONVENTIONAL SYMBOLS USED IN THE YEARBOOK

Dash (—)	– not observed
Dots (...)	– not available
Symbol (c)	– data are not published in order to ensure compliance with the requirements of the Law of Ukraine <i>On the State Statistics</i> regarding confidentiality of statistical information
Symbol (x)	– not applicable
Zero (0; 0,0)	– data are very negligible for the units of measurement
“of which”, “including”	– not all components of the total sum are given. There are cases when all components of the total sum are given, however when rounding the sum of the components may not equal the total

## CONTENTS

<b>FOREWORD</b> .....	3
<b>ABBREVIATIONS USED IN THE YEARBOOK</b> .....	3
<b>CONVENTIONAL SYMBOLS USED IN THE YEARBOOK</b> .....	3
<b>1. BASIC GEOPOLITICAL AND ECONOMIC CHARACTERISTICS</b> .....	21
1.1. Geographical and political characteristics .....	21
1.2. Religious organisations .....	22
1.3. Administrative and territorial units, by region .....	23
1.4. Basic social and economic indicators .....	24
1.5. Indices of basic social and economic indicators .....	26
<b>2. POPULATION AND MIGRATION</b> .....	27
2.1. Population .....	29
2.2. Present population in 1939–2021 .....	29
2.3. Present population, by region .....	30
2.4. Resident population, by sex and region .....	31
2.5. Resident population, by age group .....	32
2.6. Resident population, by sex and age .....	33
2.7. Resident population, by main age group and region .....	34
2.8. Pensioners of all categories .....	35
2.9. Pensioners of all categories, by region .....	35
2.10. Number of the registered live births, deaths and natural population increase (decrease) .....	36
2.11. Total rates for births, deaths, natural increase (decrease) in the population .....	36
2.12. Number of live birth, deaths, natural increase (decrease) in population by region, 2021 .....	37
2.13. Total rates for births, deaths, natural increase (decrease) in the population by region, 2021 .....	38
2.14. Live births by sex .....	39

2.15. Birth rates by age .....	39
2.16. Share of live births born to mothers who are not in registered marriage .....	40
2.17. Crude birth rates .....	40
2.18. Population mortality, by major causes of death .....	41
2.19. Mortality rates of population, by age .....	41
2.20. Number of the dead of infants under 1 year old, by region .....	42
2.21. Mortality rates of infants under 1 year old, by region .....	43
2.22. Life expectancy at birth by sex .....	44
2.23. Life expectancy by sex and age group in 2021 .....	44
2.24. Marriages and dissolved marriages .....	45
2.25. Marriages and dissolved marriages in 2021, by region .....	45
2.26. Number of registered marriages by pre-marital status of couple .....	46
2.27. Population migration in 2021, by region .....	46
<b>3. LABOUR MARKET .....</b>	<b>47</b>
3.1. Population, by participation status in the labour force .....	50
3.2. Population in 2021, by participation status in the labour force, sex and place of residence .....	50
3.3. Labour force, by region .....	51
3.4. Number of employment, by type of economic activity .....	52
3.5. Employment, by region .....	53
3.6. ILO unemployment, by region .....	54
3.7. Labour force in 2021, by sex and age group .....	55
3.8. Employment rate in 2021, by sex, place of residence and age group .....	55
3.9. ILO unemployment rate in 2021, by sex, place of residence and age group .....	55
3.10. ILO unemployed, by duration of job search .....	56
3.11. ILO unemployed in 2021 by duration of job search by sex .....	56
3.12. ILO unemployed, by cause of unemployment .....	57
3.13. Average annual number of regular employees, by type of economic activity .....	58
3.14. Average annual number of regular employees, by region .....	59
3.15. Average number of regular employees, by type of economic activity of industry .....	60
3.16. Employees recruitment and dismissal rate, by type of economic activity .....	61
3.17. Use of employees' working hours in 2021, by type of economic activity .....	62

3.18. Use of employees' working hours in 2021, by type of economic activity in industry .....	63
3.19. Collective agreements concluded, by type of economic activity .....	64
3.20. Average monthly wages of regular employees .....	65
3.21. Average monthly nominal and real wages of regular employees .....	65
3.22. Distribution of regular employees in December of 2019–2021, by nominal wages .....	66
3.23. Average monthly nominal wages of regular employees, by type of economic activity .....	66
3.24. Average monthly nominal wages of regular employees, by region .....	67
3.25. Average monthly nominal wages of regular employees, by type of economic activity of industry .....	68
3.26. Number and nominal wages of regular employees in 2021, by sex and type of economic activity .....	69
<b>4. INCOME AND LIVING CONDITIONS .....</b>	<b>70</b>
4.1. Population income and expenditure .....	72
4.2. Structure of population income in 2020 .....	73
4.3. Structure of population expenditure and savings in 2020 .....	73
4.4. Population income, by region .....	74
4.5. Average monthly pension .....	75
4.6. Differentiation of household living standards .....	76
4.7. Households, by size and number of children .....	77
4.8. Households with children, by number of children .....	77
4.9. Population, by per capita equivalent money income .....	78
4.10. Households, by per capita equivalent money income .....	79
4.11. Households in 2021, by per capita equivalent money income, household size and number of children .....	80
4.12. Structure of household money expenditure .....	81
4.13. Structure of household money expenditure, by household size .....	81
4.14. Structure of money expenditure for households with children, by number of children .....	82
4.15. Structure of household money expenditure in 2021, by different per capita equivalent money income .....	82
4.16. Population, by total per capita equivalent income .....	83
4.17. Households, by total per capita equivalent income .....	84

4.18. Households in 2021, by total per capita equivalent income, household size and number of children .....	85
4.19. Structure of total household expenditure .....	86
4.20. Structure of total household expenditure, by household size .....	86
4.21. Structure of total expenditure for households with children, by number of children .....	87
4.22. Structure of total household expenditure in 2021, by different total per capita equivalent income .....	87
4.23. Structure of household expenditure in 2021, by basic consumption expenditure .....	88
4.24. Structure of household money income .....	89
4.25. Structure of household money income, by household size .....	89
4.26. Structure of money income for households with children, by number of children .....	90
4.27. Structure of household money income in 2021, by different money per capita equivalent income .....	90
4.28. Structure of household total resources .....	91
4.29. Structure of household total resources, by household size .....	92
4.30. Structure of total resources of households with children, by number of children .....	93
4.31. Structure of household total resources in 2021, by different total per capita equivalent income .....	94
4.32. Foodstuffs consumed by households .....	95
4.33. Foodstuffs consumed by households, by household size .....	95
4.34. Foodstuffs consumed by households with children, by number of children within household .....	96
4.35. Foodstuffs consumed by households in 2021, by different total per capita equivalent income .....	96
4.36. Foodstuffs consumed by households, by quintile (20%) group and total per capita equivalent income .....	97
4.37. Foodstuffs consumed .....	98
4.38. Consumed nutrients .....	99
4.39. Availability of selected durable goods in households .....	99
4.40. Distribution of households by access to the Internet .....	100
4.41. Distribution of the population by purpose of the Internet services usage .....	101
<b>5. COMMUNITIES AND HOUSING .....</b>	<b>102</b>
5.1. Housing stock .....	103
5.2. Housing stock facilities, by type of area .....	103

5.3. Housing stock, by region .....	104
5.4. Old housing stock, by region .....	105
5.5. Emergency housing stock, by region .....	106
<b>6. EDUCATION .....</b>	<b>107</b>
6.1. Pre-school educational institutions .....	108
6.2. Pre-school educational institutions, by region .....	109
6.3. Children enrolled in pre-school educational institutions, by region .....	110
6.4. Children in pre-school educational institutions, by language of instruction and region .....	111
6.5. Tertiary educational institution in 1914–2021 .....	112
6.6. Enrollment in educational institutions .....	113
6.7. General secondary educational institutions .....	113
6.8. General secondary educational institutions, by region .....	114
6.9. General secondary educational institutions at the beginning of 2021/22 by region .....	115
6.10. General secondary educational institutions at the beginning of 2021/22 academic year .....	116
6.11. Evening (part-time) general secondary educational institutions .....	116
6.12. Pupils of day general secondary educational institutions, by language of instruction and region .....	117
6.13. Pupils graduating from general secondary educational institutions .....	118
6.14. Professional (vocational and technical) educational institutions .....	118
6.15. Number of persons issued from professional (vocational and technical) educational institutions, by region .....	119
6.16. Institutions of professional pre-tertiary and tertiary education .....	119
6.17. Admission and graduation of specialists by institutions of pre-tertiary education by sources of financing of education in 2021 .....	120
6.18. Enrollment and graduation of experts by tertiary education institutions by source of financing in 2021 .....	120
6.19. Institution of professional pre-tertiary and tertiary education, by region .....	121
6.20. Training of postgraduate students .....	122
<b>7. HEALTH CARE AND SOCIAL PROTECTION .....</b>	<b>123</b>
7.1. Health care institutions, facilities and personnel .....	125
7.2. Health care indicators .....	125
7.3. Physicians of all specialisations, by region .....	126
7.4. Paramedical personnel, by region .....	127
7.5. Hospital beds, by region .....	128
7.6. Planned capacity of out-patient and polyclinic institutions, by region .....	129
7.7. Incidence of selected infectious diseases .....	130

7.8. HIV infections and number of persons registered as HIV positive .....	130
7.9. HIV infected and HIV positive, by region .....	131
7.10. Incidence of malignant tumours .....	132
7.11. Incidence of malignant tumours in 2021, by location .....	132
7.12. Incidence of active tuberculosis .....	132
7.13. Incidence of active tuberculosis, by region .....	133
7.14. Incidence of venereal disease .....	134
7.15. Abortions .....	134
7.16. Industrial injuries .....	134
7.17. Number of persons with disabilities, by region .....	135
7.18. Number of newly recognized persons with disabilities by class of diseases in 2021 .....	136
7.19. Number of newly recognized persons with disabilities by region .....	137
7.20. Care homes for the aged persons and persons with disabilities(adults, children and the youth) ....	137
7.21. Care homes for the aged persons and persons with disabilities (adults, children and the youth), by region .....	138
7.22. Cash benefits to low-income persons incapable of working .....	139
7.23. Provision of targeted in-kind and monetary aid by entity rendering social services in 2021 .....	139
7.24. Selected boarding schools and institutions for social protection of children .....	140
7.25. Adopted orphans and children deprived of parents' guardianship .....	141
7.26. Children who were in centres of social and psychological rehabilitation and shelter-care facilities for children .....	142
 <b>8. CULTURE, LEISURE, SPORT AND TOURISM .....</b>	 <b>143</b>
8.1. Cultural institutions in 1913–2021 .....	144
8.2. Libraries, cinemas and club-houses .....	145
8.3. Art schools .....	145
8.4. Publication of books, magazines and newspapers .....	146
8.5. Sports school for children in 2021, by region .....	147
8.6. Activity of physical training and sports institutions .....	148
8.7. Sports facilities .....	149
8.8. Physical training and health activity in 2021 .....	150
8.9. Number of tourists serviced by tour operators and travel agents, by type .....	150
 <b>9. JUSTICE AND CRIME .....</b>	 <b>151</b>
9.1. Number recorded criminal offences, by individual species .....	152
9.2. Number of the registered criminal offences by region .....	152

9.3. Criminal offences in the sphere of distribution of narcotic drugs, psychotropic substances, their analogues or by precursors .....	153
9.4. Court convictions, by selected crime .....	153
9.5. Court convictions, by region .....	154
9.6. Institutions executing sentences and number of prisoners .....	155
9.7. Number and composition of children who are registered with units for preventive activity on juvenile prevention .....	155
9.8. Consideration of cases (applications) by courts of first instance in the procedure of civil justice .....	156
9.9. State notary services .....	156
9.10. Fires .....	157
9.11. Fires, by cause .....	157
<b>10. NATURAL RESOURCES AND ENVIRONMENT PROTECTION .....</b>	<b>158</b>
<b>Land .....</b>	<b>160</b>
10.1. Lands of Ukraine .....	160
10.2. Preserves and national nature parks .....	160
<b>Water resources .....</b>	<b>161</b>
10.3. Water supply and water drainage, basic indicators .....	161
<b>Atmosphere .....</b>	<b>162</b>
10.4. Emission of pollutants and carbon dioxide into the atmosphere .....	162
10.5. Stationary pollutant emissions and carbon dioxide into the atmosphere in 2021, by type of economic activity .....	163
10.6. Stationary pollutant emissions into the atmosphere, by region and selected cities and towns .....	164
10.7. Pollutant emissions and carbon dioxide into the atmosphere from stationary sources of pollution in 2021, by region .....	168
<b>Wastes .....</b>	<b>169</b>
10.8. Basic indicators for the generation and treatment of wastes of 1 <sup>st</sup> –4 <sup>rd</sup> hazard category .....	169

10.9. Basic indicators for the generation and treatment of wastes of 1 <sup>st</sup> –3 <sup>rd</sup> hazard category .....	170
10.10. Generation of wastes, by hazard category .....	171
10.11. Wastes accumulated during exploitation at sites for wastes removal, by hazard category .....	171
10.12. Generation of wastes, by category of materials .....	172
10.13. Wastes generation by type of economic activity of enterprises and in households .....	173
<b>Use of environment, economic indicators .....</b>	<b>174</b>
10.14. Capital investment and current costs for environmental protection .....	174
10.15. Capital investment for environmental protection, by purpose .....	174
10.16. Current expenditure for environmental protection, by purpose .....	175
<b>11. NATIONAL ACCOUNTS .....</b>	<b>176</b>
11.1. Gross domestic product (GDP) .....	178
11.2. GDP production and distribution, by type of economic activity .....	178
11.3. GVA structure, by type of economic activity in volume of GDP .....	182
11.4. GDP structure, by income category .....	182
11.5. GDP, by category of final use .....	183
11.6. Integrated table of national accounts for 2020 .....	184
11.7. Input-output at consumer prices in 2020 .....	190
11.8. Gross regional product .....	193
11.9. Share of gross regional product in the general total .....	194
11.10. Per capita gross regional product .....	195
11.11. Volume indices of gross regional product .....	196
<b>12. GOVERNMENT FINANCE AND CREDIT .....</b>	<b>197</b>
12.1. Consolidated budget of Ukraine .....	198
12.2. Ukraine's Central budget deficit and sources used for its funding .....	199
12.3. Budgets of Ukraine (excluding inter-budget transfers) .....	199
12.4. Monetary aggregates .....	203
12.5. Resident deposit-taking corporations (banks) loans .....	203
<hr/>	
Statistical Yearbook of Ukraine for 2021	11
State Statistics Service of Ukraine	

12.6. Official exchange rate of hryvnia to foreign currencies set by the National Bank of Ukraine, average per year .....	203
12.7. Deposits by households, held with deposit-taking corporations (banks) .....	203
<b>13. PRICES</b> .....	204
13.1. Price indices .....	205
13.2. Consumer price indices and industrial producer price indices in 2005–2021 .....	205
13.3. Consumer and producer price indices .....	205
13.4. Indices of consumer prices for the basic groups of goods and services .....	206
13.5. Consumer price indices, by region .....	207
13.6. Consumer price indices in 2021, by region .....	208
13.7. Industrial producer price indices, by type of activity .....	210
13.8. Producer price indices, by selected consumer goods .....	211
13.9. Price indices for agricultural products sold by agricultural enterprises .....	211
13.10. Price indices for construction .....	212
13.11. Tariff indices for post and communication services for enterprises, departments, organisations ...	212
13.12. Tariff indices for shipment of cargo by rail .....	213
<b>14. THE REGISTER OF STATISTICAL UNITS</b> .....	214
14.1. Number of registered legal persons, by region .....	215
14.2. Number of registered legal persons, by the organisational and legal forms .....	216
14.3. Number of registered legal persons, by type of economic activity .....	218
<b>15. CAPITAL ASSETS</b> .....	219
15.1. Capital assets, by type of economic activity .....	220
15.2. Cost of new fixed assets received during the year, by type of economic activity .....	221
15.3. Degree of depreciation of capital assets, by type of economic activity .....	222
<b>16. ENERGY</b> .....	223
16.1. Usage of fuel in 2020, by selected type of economic activity .....	224
16.2. GDP energy intensity .....	225
16.3. Structure of the consumed fuel in 2020, by purpose .....	225
16.4. Usage of selected types of fuel in 2020, by region .....	226
16.5. Capacity and delivery of energy in 2020, by source for energy supply .....	227

16.6. Usage of energy by basic type of economic activity .....	227
16.7. Energy balance for 2019 .....	230
16.8. Energy balance for 2020 .....	232
<b>17. INDUSTRY .....</b>	<b>234</b>
17.1. Industrial production indices, by type of activity .....	234
17.2. Industrial production indices, by region .....	236
17.3. Industrial production indices of foodstuffs, beverages and tobacco products enterprises, by type of activity .....	237
17.4. Industrial production indices of coke and refined petroleum products enterprises, by type of activity .....	238
17.5. Industrial production indices for chemicals and chemical products, by type of activity .....	238
17.6. Industrial production indices of rubber and plastic products, manufacture of other non-metallic mineral products, by type of activity .....	238
17.7. Industrial production indices of engineering, by type of activity .....	239
17.8. Industrial products sold (goods, services), by type of economic activity .....	240
17.9. Output of selected types of products by mining and quarrying industry .....	242
17.10. Output of selected types of products by foodstuffs and beverages .....	242
17.11. Output of selected types of engineering .....	243
17.12. Output of industrial products, by type .....	243
17.13. Output of sausages and similar products of meat, offal or blood and food preparations based thereon (excluding liver sausages and prepared meals and dishes), by region .....	258
17.14. Output of crude sunflower-seed oil and its fractions (excluding chemically modified), by region .....	259
17.15. Output of milk and cream of a fat content more than 1% but less than 6%, not concentrated nor containing added sugar or other sweetening matter, in immediate packings of a net content no more than 2 L, by region .....	260
17.16. Output of grated, powdered, blue-veined and other non-processed cheese (excluding fresh cheese, whey cheese and curd), by region .....	261
17.17. Output of curdled milk, cream, yogurt and other fermented products, by region .....	262
17.18. Output of wheat or meslin flour, by region .....	263
17.19. Output of fresh bread containing by weight in the dry matter state $\leq$ 5% of sugars and $\leq$ 5 % of fat (excluding with added honey; eggs; cheese or fruit), by region .....	264
17.20. Output of refined white cane or beet sugar in solid form, by region .....	265

<b>18. AGRICULTURE, HUNTING, FORESTRY. FISHERY</b> .....	265
<b>Agriculture</b> .....	268
18.1. Index of agricultural products, by category of enterprises .....	268
18.2. Index of agricultural products .....	268
18.3. Index of agricultural products, by region .....	269
18.4. Structure of agricultural production, by type .....	270
18.5. Structure of agricultural production, by category of producers .....	270
18.6. Structure of agricultural production, by type in 2021, by region .....	271
18.7. Structure of agricultural production, by category of producers in 2021, by region .....	272
18.8. Distribution of enterprises engaged in agricultural activity in 2021, by size of agricultural lands .....	273
18.9. Structure of production cost of agriculture products (operations, services) by enterprises .....	273
18.10. Profitability of production of basic types of agricultural products by enterprises .....	274
18.11. Average prices for selling agricultural products by agricultural enterprises .....	275
<b>Crop growing</b> .....	276
18.12. Distribution of land areas and agricultural lands .....	276
18.13. Sown area for agricultural crops in 1940–2021 .....	276
18.14. Sown area for agricultural crops .....	277
18.15. Sown area for agricultural crops in 2021, by region .....	278
18.16. Harvested area .....	279
18.17. Area planted with fruit and berry crops, and grapes .....	279
18.18. Output of agricultural crops in 1913–2021 .....	280
18.19. Output of agricultural crops .....	281
18.20. Output of agricultural crops, by category of enterprises .....	282
18.21. Share of the agricultural crop production by household holdings .....	283
18.22. Per capita agricultural crop production .....	283
18.23. Output of grain and leguminous crops, by region .....	284
18.24. Output of factory sugar beets, by region .....	285
18.25. Output of sunflower, by region .....	286
18.26. Output of potatoes, by region .....	287

## 1. BASIC GEOPOLITICAL AND ECONOMIC CHARACTERISTICS

### 1.1. Geographical and political characteristics

**Ukraine** is an Eastern European state washed with the Black and Azov seas to the South.

**Present population** as of January 1, 2022 41,2 mln. (excluding the temporary occupied territory of the Autonomous Republic of Crimea and the city of Sevastopol)  
**Area** 603,5 thsd.sq.km (State Service on Geodesy, Cartography and Cadaster of Ukraine)

**Length**  
 from West to East 1316 km  
 from North to South 893 km  
 of borders 6993,63 km

**Extreme border locations**  
 Northern Hremiach Village (Chernihiv oblast)  
 Southern Sarych Cape (Autonomous Republic of Crimea)  
 Western neighbourhood Chop city (Zakarpattya oblast)  
 Eastern Village Rannya Zorya (*formerly* Chervona Zirka (Luhansk oblast))<sup>1</sup>

#### Neighbouring countries

Poland; Slovakia; Hungary; Romania; Moldova, Republic of; russian federation; belarus.

#### Climate

The Eastern European Plain (95% of the area), together with Ukrainian Carpathians and Crimean Mountains (5% of the area) have mainly a temperate continental climate. The Southern Crimean climate has subtropical features.

#### Annual rainfall in 2021

(source: the Ukrainian Hydrometeorological center; mm)

Steppe	647	Forest	709
Forest-steppe	612	Kyiv city	533

#### Air temperature

(source: the Ukrainian Hydrometeorological center; °C)

#### Average monthly air temperature in 2021

	January	July
Steppe	-1,2	24,6
Forest-steppe	-2,4	23,3
Forest	-1,9	22,7
Kyiv city	-2,6	24,6

The absolute minimum of air temperature in 2021 – minus 32° – was observed in January in the Luhansk regions.

The absolute maximum of air temperature in 2021 – plus 39° – was observed in July in the Luhansk regions.

#### Biggest rivers

(length within the borders of Ukraine; km)

Dnipro	1121	Inhulets	549
Dnister	925	Psel	520
Pivdennyi Buh	806	Sluch	451
Siverskyi Donets	700	Styr	424
Horyn'	577	Zakhidnyi Buh	401
Desna	575	Oril'	346

## BASIC GEOPOLITICAL AND ECONOMIC CHARACTERISTICS

<b>Biggest lakes and estuaries</b>

Pip Ivan	1936	Angara-Burun	1453

<sup>1</sup> See the footnote to Table 10.6

This geographic note was compiled on the basis of the *National Atlas of Ukraine* (Kyiv: SSPE Kartographia, 2007).

### **Political system**

On 28 June, 1996 the Constitution was adopted, which gave Ukraine the status of a republic. The country includes the Autonomous Republic of Crimea and 24 administrative regions (oblasts), Kyiv and Sevastopol cities. These cities have special status prescribed by Ukraine's laws.

The head of the State is the President who executes his authority on its behalf. The President is elected by Ukrainian citizens by equal vote and direct countrywide elections for the period of five years and not more than two consecutive terms.

The integral legislative body is the Parliament – the Verkhovna Rada of Ukraine.

The top executive authority is the Cabinet of Ministers of Ukraine.

Sovereignty and the only source of the government power belong to the people of Ukraine.

The main public holiday is Independence Day – 24 August.

### **1.2. Religious organisations<sup>1</sup>**

<sup>5</sup> Since 2005, including commercial cargo transportation by natural persons-entrepreneurs

<sup>6</sup> Including automobile passenger transportation by small businesses (natural and legal persons)

<sup>7</sup> Volumes of exports/imports of goods and services have been revised according to the Technique for retrospective re-calculation of value of services for processing in external economic activity (SSSU decree № 419 of December 31, 2014)

<sup>8</sup> For 2000 and 2005, data on legal persons and separate units of legal persons are presented taking into account the qualification requirement for the number of the employees, since 2010 data on legal persons and separate units of legal persons with the number of employees equaling 10 and more are given

BASIC GEOPOLITICAL AND ECONOMIC CHARACTERISTICS

**1.5. Indices of basic social and economic indicators**

(percent of the previous year)

<sup>2</sup> See the second footnote to Table 1.4

<sup>3</sup> See methodology notes to Chapter 17

<sup>4</sup> See methodology notes to Chapter 20

<sup>5</sup> Before 2016 inclusive, data include legal persons and natural persons-entrepreneurs who were engaged in retail trade; since 2017, legal persons and natural persons-entrepreneurs whose main type of economic activity is retail trade. See methodological explanations to Chapter 23

<sup>6</sup> Data comparisons are impossible due to changes in survey organisation

## 2. POPULATION AND MIGRATION

**Present population** consists of those who are at the time of the census reside at a given location, including persons living temporarily at the location (provided their absence at place of residence is no more than 12 months).

**Resident population** consists of those who permanently live at a given location at the time of the census, including those who are temporarily absent, if their absence at place of residence does not exceed 12 months.

**Urban and rural population.** The urban population is the population living in cities and towns. who resides in urban type settlements. The rural population is the population living in villages and settlements.

Data on the number of the population as of January 1, 2015/2022 are given excluding the temporarily occupied territory of the Autonomous Republic of Crimea and the city of Sevastopol. The calculations (estimates) of the number of the population are based on available administrative data on the state registration of birth and death and change in registration of place of residence.

Information on the number of live births, deaths, natural increase (decrease) of population, arrivals, departures, migration increase (decrease) of the population, marriages and divorces for 2014/2021 is presented excluding the Autonomous Republic of Crimea and the city of Sevastopol and a part of the temporary occupied territories in the Donetsk and Luhansk regions.

Due to the lack of information on the temporarily occupied territory, the relative indicators of births, deaths, natural increase (decrease) of the population, marriage, divorce, reproduction of the population of average life expectancy in Ukraine for 2015–2021 is calculated without taking into account the relevant data on excluding the relevant data the

temporarily occupied territory of the Autonomous Republic of Crimea, the city of Sevastopol and data in the Donetsk and Luhansk regions.

**The number of pensioners** is the number of people at the beginning of the year, who are assigned a monthly cash payment for their existence on the conditions provided by law.

**Age** is the period from the birth of a person till one or another moment of life. It is defined by the number of full years that a person lived at that moment.

**Population age group** is a set of persons of a certain age.

Information about births, deaths and marriage rates is compiled basing on births, deaths and marriages vital records, which are completed by the civil registries.

Information about divorces before 2011 has been compiled basing on vital records about the end of marriage which are filled in by civil registries. Since 2011, information about divorces is compiled on the basis of available administrative data on the state registration of marriage annulments and data from the State Judicial Administration of Ukraine.

**Natural increase (decrease) in the population** is the difference between the number of live births and deaths.

**Crude birth, death, marriage, divorce, natural increase (decrease) rates** are the ratio of the relevant number of live births, deaths, registered marriages, disrupted marriages, natural increase (decrease) in the population during the calendar year to average annual number of available population.

**Birth rates by age group (age specific birth rates)** are the ratio of the number of live births during the year born to women of this

age group to average annual number of women at this age. While defining the indicators of age group that is younger than 20 years, the number of women aged 15–19 is conditionally taken. The compilation of indicators for age group 15–49 year old is made taking into account the children born to women over the age of 49 years and under the age of 15 years.

**Aggregate birth rate** shows the average number of children that could have been born to one woman during the total reproduction period (15–49 year old) while preserving at every age the birth rate of that year for which the age coefficients have been calculated. Aggregated birth rate is calculated as a sum of age specific birth rates for the age groups in interval 15–49 years.

**Death rates by cause** is the ratio of the number of deaths from the indicated death causes to average annual number of available population.

**Population death rates by age group (age specific death rates)** is the ratio of the number of dead persons of specific age group to average annual number of resident population in this age group.

**Death rate for infants under 1 year old** is the ratio of the number of the dead under 1 year old to the number of live births.

**Average life expectancy at birth** is the average number of years that live births would live provided that the death rates were the same as they had been for a year of calculation.

**Average life expectancy of the population after reaching an exact age** is the average number of years that could be lived by those who have lived to a certain age provided that the age specific death rates remain the same as they had been for a year of calculation.

**Migration increase (decrease) in the population** is the difference between those who arrived to a certain territory and those who departed outside it. Information about migration is compiled according to data on declaration/registration of place of residence and de-declaration/deregistration of place of residence of persons in Ukraine which are provided by the registration bodies (executive bodies of rural, village or city council).

### 3. LABOUR MARKET

Since 1995, in accordance with the recommendations of the International Labour Organisation (hereinafter – the ILO), a sample survey of the population (households) on economic activity (since 2019, the labour force survey) has been introduced into the practice of official statistics. This survey is conducted at the place of permanent residence of the population and covers persons aged 15 and older (until 2019, aged 15–70), for which estimates of labour force, employment and unemployment are calculated.

In order to ensure a comparison of the indicators in the dynamics in tables 3.1–3.12, the information is given according to the results of the labour force survey of persons aged 15–70.

**The labour force** (until 2019, economically active population) is the number of people of both sexes for aged 15 and older (until 2019, aged 15–70), which may adhere to the supply of labour in the labour market. Employed and unemployed in total make up the labour force.

**Employed** are considered to be persons aged 15 and older (until 2019, aged 15–70), which:

during the reference week were employed at least one hour to receive cash or in-kind payment. They worked individually (self-employed) or were employed by other individuals or worked at their own (family) enterprise; worked for free at enterprises or own business that belongs to any member of household or were employed at private subsidiary agriculture in order to sell products produced as a result of this activity;

were temporally absent from work, i.e. were formally attached to work place, had own enterprise (business) however, they did

not work during the reference period for certain reasons.

The total number of the employed population by type of economic activity (Table 3.4) is distributed in line with *the Classification of Types of Economic Activity* (State Classifier 009:2010) based on the comprehensive assessment by integrating data from labour force survey, the state statistical observations over enterprises and administrative reporting.

**The level of population participation in the labour force** (until 2019, the level of economic activity of the population) is defined as the ratio (as a percentage) of the labour force aged 15 and older (until 2019, economically active population aged 15–70) to the total population or the population of the relevant socio-demographic group.

**Employment rate of the population** is a ratio (percent) of the employed aged 15 and older (until 2019, aged 15–70) to the total population of the specific age or population by the relevant social and demographic characteristics.

Following **ILO methodology**, the **unemployed** are defined as persons aged 15 and older (until 2019, aged 15–70) who meet the following three requirements: were without work (gainful employment); during the last four weeks were actively seeking a job or were trying to establish their own business; during the recent two weeks were available to work, i.e. to be employed or to work at their own enterprise in order to get wages or income. The category of the unemployed includes persons who will start working during the next two weeks; have found a job or await a reply.

**Unemployment rate (according to the ILO methodology)** – the ratio (as a

percentage) of the number of unemployed aged 15 and older (until 2019, aged 15–70) to the labour force (until 2019, the economically active population) of the specified age or the corresponding social demographic group.

Within the framework of labour force survey of the population, prior to 2012 the working age persons include women aged 15–54 year old and men aged 15–59 year old. According to Ukraine's law *On Actions Regarding the Legal Support to Reforming the Pension System*, in 2012 the working age population includes women aged 55 years old. In 2013 the working age population includes women aged 56 years old, in 2014 women aged 57 years old, in 2015 women aged 58 years old, in 2016 women aged 59 years old.

**Persons who are not part of the labour force** (until 2019, economically inactive population) – persons aged 15 and older (until 2019, aged 15–70), who during the surveyed week did not belong to the employed or unemployed population.

The indicators from Tables 3.13–3.26 are defined on the basis of data from the state statistical observations that cover legal persons and separate units of legal persons (hereinafter enterprises) that make use of wage labour. Since 2010, to produce the population of units for these observations, the following methodological principles are applied: large and medium-sized enterprises with the average number of employees (including temporary ones) of 50 and more are subject to complete enumeration while enterprises with the number of employees from 10 to 49 persons are covered by sample method (sample).

In Tables 3.13, 3.15, 3.23, 3.25 data for 2010 have been recalculated according to the *Classification of Types of Economic Activity* (State Classifier 009:2010) that took effect on January 1, 2012.

In graph 3.22, data for 2019–2020 are provided for legal persons and separate units of legal persons with the number of persons employed equaling 10 and more persons; since 2021 – compiled by legal persons with

the number of persons employed equaling 10 and more persons according to data from the register of insured persons of the State Register of Compulsory State Social Insurance.

**Average registered number of regular employees** covers the persons who are in labour relationship with the enterprise and receive wages except those temporarily absent from work, for whom the working place is kept (on maternity leave or additional holiday on child care upon achievement of the age stipulated by legislation, and those who do call-up military service) as well as those working according to civil and legal treaties. It is averaged over a period:

over the month by summing up the number of registered employees for each calendar day of the month, i.e. from the 1<sup>st</sup> to 30<sup>th</sup> or 31<sup>st</sup> day including the holidays (off-days) and week-ends and by dividing the obtained sum by the relevant number of calendar days of the reference month;

over the year by summing up the average registered number of employees for all months of work that passed during the reference year and by dividing the obtained sum by the number of months (i.e. 12).

A working person is recorded only once (by place of main job) regardless of the duration of labour agreement and duration of work hours.

Information about **the movement of employees** on the roll is characterized by changes in the number of regular employees due to recruitment and dismissals for different reasons.

Information about the **number of concluded and registered collective agreements** is submitted by enterprises where they act according to Ukraine's law *On Collective Contracts and Agreements*.

The number of employees covered by collective agreements includes the employees who are on the staff of an enterprise regardless of their membership in trade union, including also those who were absent due to different reasons at the moment when the report was drafted.

**Worked hours** are measured in man-hours for employees who actually worked at the enterprise including those who are part-time employees, performed overtime work, worked during week-ends and holidays (off days) or worked extra month (on top of the schedule) as well as man-hours of work by internal dual jobholders or home-workers.

**Non-worked time** is time has not been worked because of valid or other reasons. It include absence of employees at work due to holidays (annual holiday, training, etc), temporary invalidity, temporary transfer to other enterprise for work, holidays without wages reservation (of which for the period of work performance termination), transfer to part-time work (incomplete working day or week), truancies, downtimes, strikes and other reasons.

**Nominal wages** relate to remuneration in cash and in kind paid to employees for time worked or work done. It also includes base wage rates (official salary), bonuses, additional payments, allowances and other kinds of payments for time not worked. Nominal wages include compulsory deductions from wages of employees: income tax from natural persons, and military tax.

Nominal wages do not include the following:

- cash security for professional servicemen, and soldiers and officer personnel;
- payments from social insurance funds for temporary disability;
- payment for the first five days of temporary disability of employer funds;

sum of employer contribution to the compulsory state social insurance.

Average monthly (for a year) nominal wages of employees defined by dividing the annual wages by the average annual number of employees and by twelve months.

In Tables 3.20, average monthly wages for 1940–1994. Prior to 1991 inclusive, the compilation of statistical indicator of size of average monthly wages was separately made for workers, employees and those engaged at collective agricultural enterprises (CAEs). Since 1992, on the basis of the national legislative acts, the common methodology for statistical recording of the basic indicators has been developed. The indicators characterize the social and labour relationships and the results stemming from the labour activity both of employees and workers, and employees from CAEs.

**Nominal wages index** reflects the nominal wages change in there porting period compared with the base one.

**Index of real wages** shows the changes in the purchasing power of the nominal wages that occur during the reference period. It is compared to the base period. It is calculated by dividing the index for the nominal wages which excludes income taxes of natural persons and military insurance during a certain period by CPI for the same period.

## 4. INCOME AND LIVING CONDITIONS

**Income of the population** (nominal income) is a sum of monetary funds and material benefits (wages, profit and mixed income; income received from property, social aid; social transfers in kind and other current transfers) aimed at supporting the physical, moral, economic and intellectual condition of human being and satisfaction of his/her needs.

**Disposable income** is nominal income after the deduction of taxes and other compulsory payments, i.e. funds used by the population for consumption and savings.

**Household living conditions sample survey** is the main source of data on the living standards of the population and its selected sections, the structure of household income and expenditure, consumption of food and services depending on the level of well-being, composition of households and other social and economic characteristics.

Since 1999 Ukraine has been conducting this sample survey. It is a continuous survey based on international standards that meet current social and demographic situation in Ukraine.

**Household** is a group of individuals who live together in a dwelling or its part and make common provision for living, keep a house, are completely or partially united and spend common funds. These individuals can be in blood or in-law relationships, be entirely unrelated or be in both of them. Household can consist of one person (Article 1 of Ukraine's law *On Population Census*).

Households participate in the survey for one year.

The survey is conducted every quarter. The survey is conducted in non-institutional (individual) households. Population who reside in collective households (compulsory-duty servicemen, the persons who are in the detention facilities, the persons who permanently reside in care homes, homes for

the aged) are not surveyed, and marginal sections of the population. The design of the sample survey excludes contaminated areas (isolated and eviction areas).

Since 2004, household living conditions survey covers dwellers in all hostels (for families, students, etc). In 1999–2003, only dwellers in family hostels were surveyed.

In 2021 the sampled population of the survey included 12148 households (excluding households who reside within the temporarily occupied territory of the Autonomous Republic of Crimea, the city of Sevastopol and a part of temporarily occupied territories in the Donetsk and Luhansk regions). During the year 7614 households took part in the survey (selected addresses accounted for 67,0%, excluding non-resident dwellings).

Since 2007, the studies of the household well-being are based on income indicators; before 2007 expenditure indicators were used.

**Monetary expenditure of the households** comprise: expenses for purchasing foodstuffs, alcoholic drinks and tobacco products, non-food items and services, expenditure associated with keeping a private subsidiary agriculture, rendering assistance to relations and other individuals, constructing, major repairing of dwellings and utility rooms, purchasing of livestock, horses and perennial plantings for private subsidiary agriculture, acquiring shares, certificates, hard currency, making deposits with banks, paying maintenance and taxes (excluding income tax), duties, contributions, etc.

**Total expenditure** consist of monetary expenditure and value of consumed by household agriculture foodstuffs that were privately produced or given by their relatives or their other individuals, benefits and non-cash subsidies meant to pay for housing, communal utilities and services, benefits for telephone calls, travelling in transport, health goods and

services, tourist services, places in sanatoria, etc. Value of privately produced foodstuffs given by households to their relatives and other individuals is included into the total expenditure since this assistance occurs in a regular arrangement.

**Monetary income of the households** includes cash and in-kind (in monetary terms) revenues that household members received as labour compensation (excluding income tax and compulsory payments), income from entrepreneurship and self-employment, property income as interests and dividends, income from selling shares and other securities, revenues from privately produced agriculture foodstuffs and products received as procurement on own behalf from own resources, pensions, stipends, social aid (benefits and subsidies in cash meant to pay for housing and communal services, electricity and fuel, compensations for the unused sanatorium-and-spa treatment entitlement, travel privileges for some categories of citizens), monetary assistance received from relatives and other individuals, and other monetary income.

**Total income** incorporates monetary income, value of the consumed output produced at a private subsidiary agriculture (excluding expenditure for output) as procurement on own behalf, benefits and subsidies meant to reimburse communal services, electricity and fuel, non-cash subsidies meant to pay for health goods and services, tourist services, places in sanatoria, etc, benefits for travelling in transport and communication and also value of foodstuffs given their relatives or other individuals.

**Total resources** includes total income, revenues from selling real estate, private and household property and the sum of the used

savings, increased loans, credits, debts that households have acquired as well as debts paid off to households. This indicator shows the potential household resources that were obtained during the reference period regardless of the sources from which they had been derived.

**Quintile coefficient for differentiating the population expenditure** is a ratio between minimal expenditure that 20% of the most well-off population have and maximum expenditure that is enjoyed by another 20% of the low-income population.

**Quintile coefficient for funds** is a ratio of the total expenditure between 20% of the most well off population and 20% of the low-income population.

Since 2011, when calculating per capita average indicators for expenditure and resources as well as indicators for differentiation of the population and households by level of material welfare according to modern international practice, a scale of equivalence was used which reflects a decrease in minimum necessary wants per one member of household due to increase in size of households and changes in its composition. Since 2000, to ensure time series comparisons, the indicators for differentiation of the population and households by level of material welfare have been revised with due account for the scale of equivalence.

Since the survey is completely new, all its components starting with the sample design and up to the system of analytical indicators are also new. It is not recommended to make comparisons with data from sample survey of family budgets which was conducted up to 1999.

<sup>1</sup> Data of the household living condition survey

<sup>2</sup> Since 2007, behind the research of the population (households) differentiation by level of material wellbeing are the indicators of monetary and total income (in 2000/2006 the indicators of monetary and aggregated expenditure were used as criteria of differentiation). Since 2011, while calculating per capita indicators as well as indicators of (households) population differentiation by level of material well being according to modern-international practice, the equivalency scale was launched. To ensure the comparisons of indicators in time series, the re-calculation of data for 2000/2010 was made taking into account the equivalence scale and the usage of income indicators as differentiation criteria

## 5. COMMUNITIES AND HOUSING

The chapter contains the information about the housing stock and its maintenance.

The state statistical observation serves a source of information.

**Housing stock** is a set of dwellings including the residential buildings, specialized homes (dormitories, shelters, care homes for the older persons and persons with disabilities both adults and children, children's homes, homes attached to schools and boarding schools), apartments, corporate housing, other dwellings in buildings fit for habitation.

The housing stock excludes country houses, summer cottages, sport and tourist centres, motels, camping sites, sanatoria, rest facilities, boarding houses, guest houses, hotels, rail coaches and other seasonal and temporary lodgements irrespective of the time period spent there by visitors.

**Total living space** comprises the area of dwelling and auxiliary areas (excluding entry vestibules in single-unit dwellings) as

well as area of verandas, terraces and balconies. The coefficients used to calculate space are: terraces and balconies – 0,3; for loggias – 0,5; glassed-in balconies – 0,8; verandes and glassed-in loggias – 1,0.

Auxiliary areas refer to kitchens, bath and shower rooms, toilets, corridors within an apartment, built-in stores and closets.

Apart from those mentioned above, the auxiliary premises of hostels are cultural and household facilities and those where medical services can be provided.

Total living space excludes the size of the following places:

staircases, lift halls, lobbies, general use corridors, halls, galleries;

uninhabited dwellings, occupied by establishments providing housing and communal services, shops, post-offices, children's educational establishments, enterprises providing consumer services, etc.

COMMUNITIES AND HOUSING

**5.1. Housing stock<sup>1</sup>**

(mln.sq.m of total size)

	2000	2005	2010	2015	2017	2018	2019	2020 <sup>2</sup>	2021

## 6. EDUCATION

The section contains statistical data on institutions of pre-school, general secondary, vocational (vocational technical), tertiary and professional pre-tertiary education, training of post-graduates and doctoral students.

**Pre-school educational institution** is an educational institution that ensures the child's right to get the pre-school education, its physical, mental and spiritual development, social adaptation and availability to continue the education.

**General secondary educational institution** is an educational institution whose main type of activity is educational activity in the sphere of general secondary education.

**Professional (vocational and technical) educational institution** is an educational institution that ensures the implementation of citizens' needs for professional (vocational and technical) education, acquiring trade jobs, professions, qualifications according to their interests, abilities, health status.

**Tertiary educational institution** is a separate type of institution, which is a legal person of private or public law and acts according to the license issued for educational activities at certain levels of tertiary education. It conducts the scientific, scientific and technical, innovation and/or

methodic activity, ensures the organisation of educational process and getting tertiary education by persons, as well as postgraduate education with due regard to their inclinations, interests and abilities.

**Institution of professional pre-tertiary education (IPPTE)** is an educational institution whose main type of activity is the educational activity in the sphere of professional pre-tertiary education.

The production of statistical information about the network and activities of institutions of professional pre-tertiary education was launched since 2020/2021 school year taking into account the provisions of Ukraine's law *On professional pre-tertiary education*.

**Getting education** implies educates, pupils, students, cadets, attendees, trainees, postgraduate students, junior scientific assistants, other persons who get education in line with any type or form of education.

The postgraduates are trained by tertiary educational institutions and scientific institutions.

**Postgraduate** is a person enrolled to tertiary educational institution (scientific institution) to get a Ph.D./Doctor of Arts degree.

## EDUCATION

## 7. HEALTH CARE AND SOCIAL PROTECTION

This section includes statistics on general morbidity rates as well as selected illnesses. It also provides data on medical institutions and staff employed. There are some statistics on residential facilities for the aged and disabled person with disability (adults and children) and data on disability.

**Data on physicians** includes all doctors with higher medical education at the end of a given year. It includes physicians employed in medical and sanatorium institutions, social protection, educational and research institutions, staff training institutions within the health care system, etc. This indicator before 2008 covered dentists with higher education and dental technicians with secondary medical education. Starting from 2008 dental technicians with secondary medical education are not taken into account in the total number of physicians.

**Paramedical personnel** is reported at the end of the year includes all persons with secondary medical education (excluding dental technicians) who are employed in medical and sanatorium institutions, social protection institutions, pre-school educational institutions, schools, orphan houses, etc.

**Data on hospital beds** is reported at the end of the year. Statistics show beds equipped with necessary supplies and available for patient use, regardless of whether the beds are occupied by patients.

**Hospitals providing care for out-patients** include all medical institutions which provide out-patient care (clinics, out-patients' departments, health centers, out-patients' departments of hospitals, hospital centers for health care, etc).

**Injured at work** is an individual who had an accident at work and died or, based on a medical certificate, is incapable of working during one or more days. This person may be

given an easier job for one or more days if a document registering the accident has been completed according to a specified form.

**Person with disability** is a person with stable disorder of body functions that when interacting with external environment could result in its life activities being restricted and due to this, the state must create the conditions for the his/her realization of rights on an equal basis with other citizens and ensure his/her social protection.

**Disability** as a measure of health loss is defined by the expert examination conducted in the institutions for medical and social assessment of the central executive body that ensures the shaping of the state policy in the sphere of health care.

**Care home for the aged citizens and persons with disabilities** is a stationary residential care institution for social protection. It is created for the day and night accommodation (residence) and care for the aged citizens and persons who for medical reasons require the nursing care, social and domestic, medical servicing, social services and a complex of rehabilitative measures.

**Children's care home** is a stationary social and medical institution designed to temporary (under six months) or permanent (more than six months) residence or accommodation of children with disability and aged from 4 to 18 year old, and persons with disability aged under 35 year old with physical, mental development and psychiatric disorders who for medical reasons require the nursing care, domestic servicing, medical aid, educational services, a complex of rehabilitation measures. According to the medical assessment, they are fit to stay in the mentioned institution regardless of availability of persons who are obliged to support then in line with legislation.

**Orphan** is a child whose parents have died.

**Children deprived of parental care** are the children left without parental care in connection with deprivation of their parental rights, deprivation of parents without deprivation of parental rights, recognition of parents missing or incapacitated, declaring them dead, serving a sentence in prison and their detention during the investigation, their search by the National Police for lack of information about their whereabouts, the long-term illness of their parents, which prevents them from fulfilling their parental responsibilities, as well as the children separated from their families, abandoned children whose parents are unknown, children who have been

abandoned by their parents, children whose parents do not fulfill their parental responsibilities for reasons that cannot be clarified due to the parents' stay in the temporarily occupied territory of Ukraine, in the areas of the anti-terrorist operation, implementation of measures to ensure national security and defense, repel and deter armed aggression in Russia Federation in Donetsk and Luhansk region, and homeless children.

**Adoption** is when an adoptive person adopts a child into his family as a daughter or a son according to a court's decision.

**Tutorship, curatorship** are appointed to orphans or emancipated children. Tutorship is provided to child under 14 years and curatorship – child between the ages of 14 and 18 years.

## 8. CULTURE, LEISURE, SPORT AND TOURISM

The section reports statistics on cultural institutions, and publication of printed editions. It also shows statistics on sanatoria and health resorts, leisure and sport and tourism facilities in Ukraine.

**Cultural institutions** comprise theatres, philharmonic societies, cinemas, publishing houses, museums, libraries, club institutions, circuses, parks for recreation and leisure, art schools (elementary specialised art educational institutions).

**Cinemas** are institutions for public viewing of films (cinemas, urban and rural film projectors, video halls and video units).

**Collective accommodation facilities** are accommodation facilities where one can stay overnight in a room or other premise with the total number of beds equaling to 10 and more. The collective accommodation facilities include hotels and similar accommodation facilities (hotels, motels), accommodation facilities for the leave period or other temporary residence (hostels, rest homes, boarding houses, recreation facilities, tourist camps, mountain skiing huts), camping sites and parking facilities for recreational vehicles, trailers and other accommodation facilities (dormitory accommodations for visitors, other places for temporary accommodation).

**Sports school** is a component of system for physical training and sports that gives knowledge, shapes and secures individual's needs in creative self-actualisation of sporting capabilities and skills of children and the young in order to train sportsmen of high qualification.

**Tour operators** are legal persons whose exclusive activity is the organization and creation of tourism product, sale and provision of tourism services as well as intermediate activity and provision of specific and related services and who obtained license for tour operator activities according to the established procedure.

**Travel agents** are legal persons and natural persons-entrepreneurs who carry out intermediate activity related to the sale of tourism product of tour operators and tourism services of other entities dealing with tourism activity as well as intermediate activity regarding the sale of specific and related services.

**Tourism** is activity of visitors who travel to the main destination outside their usual environs (provided that the duration of such a trip is less than a year) with any main purpose (business trip, recreation or other personal purpose) apart from wage work at resident entity in the country or place of visiting.

**Tourist** is a visitor (domestic, inbound or outbound) whose trip includes overnight stop.

**Outbound tourism** is activity of resident visitors outside the relevant country during outbound tourist trip.

**Inbound tourism** is activity of resident visitors inside the relevant country during inbound tourist trip.

**Domestic tourism** is an activity of resident visitors within the limits of appropriate country during domestic tourist trip or part of outbound tourist trip.

## 9. JUSTICE AND CRIME

**Criminal Code of Ukraine** is a systemized set of legal rules established by the highest legislative body that define what socially dangerous acts are criminal and what punishments are to be administered for persons who committed crimes.

**Criminal offence** is a socially dangerous guilty act (action or inactivity) specified by the Criminal Code and which was committed by a subject of criminal offence. Criminal offences are split into criminal misdeeds and crimes.

**Crime** is a socially dangerous guilty, illegal and criminally punishable act (action or inactivity) committed by subject of crime.

Crimes are split into non-grave, grave and especially grave crimes.

**The responsibility of minors** – persons are subject to criminal responsibility who before committing criminal offence turned 16 year old.

Persons who committed criminal offences at the age of 14 to 16 year old are subject to criminal responsibility only for intentional homicide, infringement of life of the state or public person, law enforcement employee, member of public organization dealing with public order maintenance and border control, or serviceman, judge, juryman due to their activity connected with justice, defender or representative of a person due to activity connected with giving the legal

aid, representative of foreign country, intentional grave bodily injury, intentional medium gravity bodily injury, animal cruelty, sabotage, racketeering, terroristic attack, hostage taking, rape, sexual violence, theft, robbery, banditry, blackmailing, intentional destruction or damage of property, damage of communication lines and transport vehicles, high jacking or capture of rail rolling-stock, air, sea or river vessel, transport vehicle unlawful seizure, hooliganism.

**Narcotic drugs** are natural or synthetic substances, preparations, plants included into the List of narcotic drugs, psychotropic substances and precursors.

**Psychotropic substances** are natural or synthetic substances, preparations, natural materials included into the List of narcotic drugs, psychotropic substances and precursors.

**Precursors** are narcotic drugs and psychotropic substance (further referred to as the precursors) – substances that are used for the production, making of narcotic drugs, psychotropic substances included into the List of narcotic drugs, psychotropic substances and precursors.

**Fire** is an uncontrolled process of elimination or damage of property by fire during which emerge the factors which are dangerous for creatures and environment.

JUSTICE AND CRIME

9.1. Number recorded criminal offences, by individual species<sup>1</sup>

## 10. NATURAL RESOURCES AND ENVIRONMENT PROTECTION

**Total land area** is an area of land together with the internal waters located within the State border.

**Preserves** are natural protective and research establishments of international and national importance created for the purpose of preservation of the typical biosphere or landscape for ecological monitoring, development of research protection and effective use of environment.

**National nature parks** are natural protective, recreational, culture and educational, research establishments of national importance that are created to preserve, recreate and use effectively the nature complexes and objects which are of special importance, and have health, historical and cultural, scientific, educational and aesthetic value.

**Use of fresh water** is the volume of water collected from natural sources or obtained from the water supply system of other users, which is used for satisfaction of different needs. Water use composition does not include the volumes of return and successive (reuse) water use (apart from water that was supplied to compensate for loss into these return and successive water economy systems) as well as collector and drainage water.

**Fresh water** is natural water with low content of salts. Usually it is regarded as fit for abstraction and purification in order to obtain drinking water.

**Fresh water abstraction** is water taken from any sources (sources of surface water such as rivers, lakes, water storage basins or showers and sources of subsoil water) for ever or temporary. It includes water abstraction by water supply sphere for

distribution and direct water abstraction for other types of activities and one's own needs.

**Water use for production needs (except agricultural use)** is volume of water used for technical needs of industry, transport, construction and other sectors of the national economy. It also includes fresh water entry for recycled water supply systems and water volumes, which were using in pond fish culture.

**Water use for household needs** is water volume used for domestic (communal) population needs (including needs of enterprise workers).

**General water drain** is the volumes of water discharged into the natural water bodies and transferred to other users.

**Contaminated return waters** are the industrial and domestic (municipal) effluents (including mine, reservoir, drainage), as well as volley discharges entering surface water bodies without treatment or after insufficient treatment and containing pollutants in quantities which leads to violation of the established norms of water quality in the control area. These do not include the amount of effluent coming to the filtration fields, in the storage, on the terrain, etc.

**Regulatory-treated return waters** are effluents that have been purified at the relevant facilities and the discharge of which after purification into water bodies does not violate the established standards of water quality in the control area or point of water use.

**Circulating and re-successive water supply** is the volume of fresh water saving owing to the use of the system for return and recycling water including the usage of waste and collector

and drainage waters. Water recycling does not include water losses in the systems for communal and production heat supply.

**Capacity of treatment facilities** is the maximum volume of return waters that can be purified in the treatment facilities at the end of reference period.

**The return water discharge into the surface water** bodies is the volumes of standard and clean, standard and purified, and polluted flows (production and communal) discharged into water bodies located on the land surface.

**Pollutant substance** is any substance or material of physical, chemical or biological nature that has negative impact on the air, water, land or biot.

**Stationary pollutant source** is enterprise, shop, power unit, processing unit or other immovable object that preserves its space coordinates during certain time and makes emissions of pollutants into the air.

**Mobile pollution source** is a transport vehicle whose movement is accompanied by pollutant emissions into the air. In particular, it is motor, rail, air, water transport and manufacturing machinery.

**Emission of the pollutants into the atmosphere from stationary source** is total amount of contaminants coming to the air basin from stationary sources both after treatment at dust-arresting and gas-cleaning systems as a result of insufficient capture and purification at organised sources and without treatment from organised and non-organised sources of pollution.

**Emission of the pollutants into the atmosphere from mobile sources** is total amount of contaminants coming to atmosphere from motor road, air, rail and water transport, and manufacturing technics.

**Emissions** are supply of pollutants or

mixture of such substances into the air by stationary and mobile pollution sources.

**Hazardous wastes** are wastes that have such physical, chemical, biological or other hazardous properties that create or can create significant danger to environment and human health and which require special methods and ways to treat them.

**Treatment of waste** are actions directed on waste generation prevention, collection, transportation, storage, processing, recycling, removing, neutralization and waste disposal including these operations supervision and control over the utilization sites.

**Disposal of wastes** is the operations with wastes that do not lead to their utilization.

**Utilization of wastes** is the usage of the wastes as the secondary material or energy resources.

**Wastes incineration** is the regulated process for the incineration of solid, liquid or gaseous wastes at high temperatures.

**Specially allocated sites and disposal facilities** are the sites or facilities for the final waste placement, for the usage of which the permit from specially authorized central executive body in the sphere of waste management was received.

**Capital investment into environmental protection** are investment for purchasing the new and the used or produced through one's own resources for own use tangible and intangible assets, expenditure for capital repair and modernization in order to protect the environment.

**Accumulation of waste** is the final placement of waste that is not subject to utilization or processing at specially allocated sites or facilities.

**Waste** are any substances, materials and things generated during production or consumption processes and also the goods

## NATURAL RESOURCES AND ENVIRONMENT PROTECTION

(products) fully or partly have lost their consumer properties, have no further use at a place of their generation or revealing, and their owner should eliminate them by recycling or removing.

**Costs on major repair of capital assets related to environment protection** are all costs in a reporting year for improvement works that lead to increase in future economic benefit primarily expected from the object use and to

the amount of which the primary value of fixed capital increases.

**Current costs on environmental protection** are costs for the support (maintenance and exploitation) of object (fixed assets related to environmental protection) in active status and included to the composition of costs of the current period.

## 11. NATIONAL ACCOUNTS

**The System of National Accounts (SNA)** is a set of interconnected, consistent, and integrated macroeconomic accounts, balance sheets, and tables based on internationally agreed terms, definitions, classifications and accounting rules. National accounts information is used to analyse the state of the economy and to shape economic policy.

The compilation national accounts of Ukraine is carried out on the basis of international standards of the United Nations System of National Accounts 2008 and Regulation (EU) of 21.05.2013 № 549/2013 of the European Parliament and Council on the European System of National and Regional Accounts 2010.

National accounts are compiled by institutional sectors of the economy according to the Classification Institutional Sectors Economy.

**Gross domestic product (GDP)** is the integrated indicator of the country's economic development that characterizes the result of production activity of residents within the country's economic territory. It is measured through the total value of goods and services produced by them for final use. It is calculated by three methods: production, income categories and final use categories. Since 2010, the estimates of the GVA have been compiled by type of economic activity (*State Classifier 009:2010*).

**Production method of calculating GDP** is characterised by output, intermediate consumption, gross domestic product (gross value added).

**Output** is the total volume of products resulting from the production activity of resident units over the reference period. Three types of output are considered in national accounts: market output, output for own final use and non-market output.

**Intermediate consumption** is goods and services consumed as resources during the production process apart from fixed assets the usage of which is taken into account as fixed capital consumption.

**Gross value added (GVA)** equals to the difference between the output and intermediate consumption. It is also defined as the sum of primary income obtained as a result

of participation in the production process: labour remuneration of employees, other taxes less other subsidies related to production, and gross operating surplus, mixed income.

The national accounts use two data levels and two estimation methods. For the economy as a whole, the results are measured by the output of goods and services and gross domestic product, while for the sectors and types of economic activities by output at basic prices and gross value added.

**Taxes on products** are the taxes which are due to be paid for unit of goods or services being produced or sold.

**Subsidies on products** are current payments which general government provide to resident producers per unit of the produced goods or services.

**Income generation** at the level of the GDP is characterised by the following indicators: labour remuneration of employees, taxes and subsidies on production and imports (at the level of the GVA by other taxes and subsidies related to production) and the gross (net) operating surplus.

**Labour remuneration of employees** is the remuneration in cash or in kind paid by employer to employee for the work done over the reference period. It includes wages and salaries; actual contributions of employers to the social insurance; imputed contributions of employers for social insurance.

Wages and salaries cover all types of labour remuneration including bonuses, premiums, additional payments in cash or in kind.

Actual contributions of employers to the social insurance consist of payments made by entities to the Pension Fund Ukraine, the Social Insurance Fund Ukraine and the Fund for compulsory state social insurance against unemployment.

Imputed contributions of employers to social insurance is the equivalent of social welfare paid by employers directly to their employees, former employees or their dependents who have the right to it. It is paid from own funds excluding the involvement of a third party.

**Taxes on production and imports** are payments charged by general government taking into account the volumes of production and imports of goods and services, employment of labour force, possession or usage of land plots, buildings or other assets in production. They are classified into taxes on products and other taxes related to production.

**Subsidies on production and imports** are current payments which general government make in favour of resident producers. They are classified into subsidies on products and other subsidies related to production.

**Other taxes related to production** are made by enterprises due to production activity regardless of the number or value of the produced or sold goods and services. Other taxes related to production can be charged on land plots, fixed assets, involvement of employees, certain types of activity or transactions.

**Other subsidies related to production** are subsidies that exclude the subsidies on products that resident producers obtain as a result of their participation in production.

**Gross (net) operating surplus** reflects the primary income obtained by corporations as a result of their participation in the production process before deducting the interests from it or other income from property.

**Mixed income** – reflects the primary income received by unincorporated enterprises in the household sector, in the composition of which it is impossible to

separate wages from the profits of the owner or entrepreneur.

**The method of calculating GDP by categories of final use** is characterized by indicators: final consumer spending, gross accumulation capital, external balance of goods and services.

**Final consumer expenditures** are the expenditures of resident institutional units for the purchase of goods and services that are used to meet individual or collective needs.

**Gross fixed capital formation** is the purchase by resident producers, less disposals, of fixed assets over the reference period including an increase in value of non-produced assets obtained due to production activity of entrepreneurs or institutional units.

**External balance of goods and services** is defined as a difference between exports and imports of goods and services.

**The table "input-output" in consumer prices** gives a detailed description of the processes of reproduction and the relationship between economic activities in the production and use of goods and services. It details the indicators of accounts of goods and services, production, formation and use of income, capital at the level of groups of goods and services.

**Gross regional product (GRP)** is an integrated indicator of economic development of Ukraine's regions which characterizes the result of residents' production activity within region's economic territory and is measured by the total value of goods and services produced by them for final usage.

## 12. GOVERNMENT FINANCE AND CREDIT

The section reveals Ukraine's budget execution, banking statistics, basic financial indicators for economic activities of enterprises and organisations.

**Budget** is a plan for formation and uses of financial resources to ensure tasks and functions to be performed by public authorities, the Autonomous Republic of Crimea's authorities and local authorities during the budget period.

**Ukraine budget system** is a summation of the state budget and local budgets which takes into account the economic relations, the state and administrative and territorial division and is regulated by rules of law.

**Local budgets** are the budget of the Autonomous Republic of Crimea, regional, district budgets and budgets of local self-governments. Budgets of local self-government – budgets of rural, settlement, city territorial communities, as well as budgets of districts in cities (in case of formation of district councils in the city).

**Ukraine consolidated budget** includes indicators of the State budget of Ukraine, consolidated budget of the Autonomous Republic of Crimea and consolidated budgets of regions, cities of Kyiv and Sevastopol.

**Budget income** are tax, non-tax and other revenues on non-repayable terms whose deductions are envisaged by the Ukraine legislation (including transfers, payment for provision of administrative services, own revenues of the budgetary establishments).

**Budget expenditure** are funds aimed at implementing the programs and plans envisaged by the relevant budget.

The budget expenditure doesn't include: debt repayment; budget lending; depositing budget funds; purchase of securities; refund of the overpaid sums of taxes and fees, and other budget revenues, their reimbursement out of the budget; compensation for a part of

the sum of penal (financial) sanctions being transferred to buyers (consumers) out of penal (financial) sanctions.

**Lending** are transactions with provision of funds from the budget on condition of repayment, payment and maturity whereupon obligations toward the budget arise (provision of credits from the budget) and transactions with the return of such funds toward the budget (return of credits toward the budget). Credits from the budget include loans and financial assistance from the budget on a repayable basis.

**Inter-budgetary transfer** are funds transferred from one budget to another on a free and irrevocable basis.

**Budget deficit** is an excess of the budget expenditure over its income (taking into account the difference between the provision of credits from the budget and return of credits toward the budget).

**Budget profit** is an excess of budget income over its expenditure (taking into account the difference between return of credits toward the budget and provision of credits from the budget).

**The financing of the budget** is the budget's revenue and expenditure connected with the change in debt, deposits and securities, funds from privatization of the state property (with regard to the state budget), change in remainder of budget funds used to meet the budget deficit or determine budget surplus.

**Credits** are financial assets which are created providing a creditor gives funds directly to a borrower and are confirmed by documents that are not circulated.

**Deposits** – claims on the other deposit-taking corporations (banks) that are represented by evidence of deposit.

**Official exchange rate of hryvnia** against foreign currencies is the rate of the national monetary unit, set by the National Bank of Ukraine of foreign currencies.

## 13. PRICES

**Consumer price index (inflation index)** is an indicator of changes in the time of prices and tariffs for goods and services being purchased by the population for unproductive consumption. The CPI calculation is based on data on the changes in prices (tariffs) obtained through the monthly registration of the prices (tariffs) in the consumer market, and national accounts data on households' expenditure for final consumption across the country as a whole using detailed data on structure of actual consumer money expenditure of households.

**Industrial producer price index** is an indicator of changes over time within industrial production. It is compiled monthly using data on prices for the industrial products which are given according to the *Nomenclature of Industrial Products (NIP)* by sampling circle of enterprises. The prices are weighed by the volume of sold industrial products in monetary terms.

**Price index for agricultural products sold by agricultural enterprises** is an indicator of changes over time to average prices for the own-produced agricultural products sold by enterprises.

**Price index for construction** the movements in construction prices over the time. It is compiled monthly based on data from other state statistical observation and administrative data. The weighing basis is the data on construction costs for certain types of building and structures.

**Index of tariffs for post and communications services** measure changes over time in tariffs for post and communications services of enterprises, establishments, and organisations. It is produced quarterly based on data on tariffs and representative services by type of services that are selected taking into account their representatives in the market for mail and communications services. The weighing base is the data on income resulting from the provision of post and communications services.

**Index of tariffs for merchandise rail** measures the changes over time in tariffs for merchandise transport according to type of freight, combination, distances. The index is estimated each quarter for each type of freight. The weighing base is data on income from haulage, freight transportation.

## 14. THE REGISTER OF STATISTICAL UNITS

**Register of Statistical Units** is database for statistical and administrative units with their characteristics aimed to conduct statistical observations over activity of enterprises. It consists of Statistical Register of Enterprises (SRE) and Statistical Register of Natural Persons-Entrepreneurs.

The administrative part of the SRE is the Unified State Register of Enterprises and Organizations of Ukraine (USREOU). It is maintained by the state statistics bodies according to Ukraine's law *On the State Statistics* and the Regulation on the Business register endorsed by the Ukraine Cabinet of Ministers' Regulation 118 of January 22, 1996 (in line with the wording of the Ukraine Cabinet of Ministers' Regulation 499 of June 22, 2005 make changes).

The Business Register entities are legal persons and separate units of legal persons which are located within the territory of Ukraine and carry out their activity based on its legislation.

The basis for data on entities to be included into the Business Register or excluded from it as well as making changes to the Business Register is information about registration actions envisaged by Ukraine's law *On the state registration of legal persons, natural persons-entrepreneurs and public formations* supplied from the Unified State Register of legal persons, natural persons-entrepreneurs and public formations (hereinafter, the USR) to the state statistics body.

**Indicators on the number of the registered legal persons** are compiled based on the USREOU data as the total number of legal persons which are registered with the USREOU.

The data given in the section reflect the changes in the number and structure of legal persons by region, and organisational and legal form of business as well as the structure of legal persons by type of economic activity.

## 15. CAPITAL ASSETS

**Capital assets** are material assets, which the enterprise keeps with the aim of their use for manufacturing or supplying of goods, rendering services, leasing to other persons or performance of administrative and social, and cultural functions. Expected term of useful usage (operation) of capital assets is more than one year (or an operational cycle, if it exceeds one year).

Capital assets include lands, buildings, constructions and transmitting devices, machines and equipment, vehicles, tools, perennial plants, animals, long-term biological activities for crop and animal production connected with agricultural activity, etc; as well as the capital assets, which are in personal property of the

population (houses, constructions, perennial plants, cattle, etc).

Fixed assets are stated at first cost (revalued).

Value of land plots, real estate, animals (that are used for other, than agricultural activity), is not distributed by types of economic activity.

Data for 2015–2018 of value fixed assets on budgetary institutions (main managers of budget funds) are included in the line "Total" without distribution by type of economic activity.

The information up to and including 2018 does not take into account the value of fixed assets of local executive authorities and local governments.

## 16. ENERGY

**Energy balances for 2019/2020** are compiled according to Regulation 203-p *On Current and Forecast Energy Balance* of the Cabinet of Ministers of Ukraine dated on March 11, 2011 according to the methodology of *International Energy Agency* (IEA) and which are published following international practice. When compiling energy balance, the indicators of the state statistical reporting and administrative data from Ukraine ministries and departments have been used.

Data on the natural gas are given using standards to measure at 15°C.

The **indicators of the GDP energy intensity** are produced as a ratio of primary energy input /energy final consumption to the GDP unit for the relevant period (according to energy balance data in tones of oil equivalent and the GDP data by purchasing power parity (PPP) compiled by the World Bank under the program *World bank development* (total primary energy delivery/energy final consumption to the GDP; tones of oil equivalent/1000 international dollars on PPP)).

**Fuel usage and stocks** for productive, communal and consumer needs are measured as the sum of expenditures of enterprises. These include expenditures for transformation into other types of fuel and energy; for non-energy purposes (as raw material, materials), for final consumption as well as expenditure on distributing, transporting and storing regardless

of the sources of their supplies (whether they have been bought with own funds or received as raw materials for the processing).

To identify the general amounts of the used fuels, as well as a proportion of the selected types of fuels in the total amount, all types of fuels are recalculated from the physical into the conventional values according to the coal equivalent (7000 kcal/kg).

**Energy delivery and supply indicators** contains information about the capacity and amounts of electric and heat energy delivered by all types of energy-generated capacities (thermal power plants meant to produce electric energy (CHP), central heating and power plant (thermal power plants with the combined cycle of electric and thermal energy production, TPP), nuclear power plants (NPP), wind power plants, solar power plants, hydroelectric plants, pumped storage plants, boiler units, recycling facilities, electric boilers, heat pumps and other energy-generated units).

The established electric and heat capacities of energy delivery sources are shown as of December 31 of the reference year.

**Energy usage indicators** contain data on the general amount of usage of electric energy (active energy), heat energy (steam and hot water) by all sources of supply (both from own production and external supplies) for production and exploitation, and utility needs of enterprises.

## ENERGY

**16.1. Usage of fuel in 2020, by selected type of economic activity**

	Usage <sup>1</sup>	Share of usage, by the selected economic activities, percent				
		agriculture, forestry and fishing	industry	construction	transport and storage; postal and courier activities	enterprises and organisations of other types of activity
<b>Total, mln.t of conventional fuel</b>	<b>100,5</b>	<b>2,7</b>	<b>76,0</b>	<b>0,7</b>	<b>3,2</b>	<b>1,7</b>
Coal, mln.t	38,0	0,1	98,8	0,0	0,1	0,5
Natural gas, bln.cub.m	29,9	1,1	66,3	0,1	3,4	1,6
Crude oil, of which oil obtained from bituminous minerals (including gas condensate), mln.t	c	c	c	c	c	c
Gasoline, thsd.t	1767,7	5,0	5,9	1,3	2,6	8,7
Gas oil (diesel fuel), thsd.t	5173,9	25,4	19,2	5,5	20,7	5,6
Heavy pet coke, thsd.t	98,2	0,1	79,9	4,4	10,2	5,4
Kerosene, thsd.t	6,4	0,6	25,7	0,5	2,6	70,6
Liquefied propane and butane, thsd.t	1384,2	2,8	11,3	0,6	1,5	2,6
Olive oil and grease; petroleum distillates heavy, thsd.t	218,4	7,3	84,7	1,6	5,1	1,2
Briquettes, ovoids and similar solid fuels manufactured from coal, thsd.t	3,8	1,7	58,1	0,0	3,5	36,7
Non-agglomerated fuel peat, thsd.t conventional moisture content	281,4	0,0	99,3	0,0	0,0	0,7
Firewood for the heating, thsd. densit cub.m	3865,4	6,5	24,7	0,5	0,6	17,2
Fuel briquettes and pellets from wood and other natural materials, thsd.t	471,8	8,0	78,0	0,4	1,6	11,8

<sup>1</sup> Data from enterprises, organisations and establishments on usage of fuel for production and exploitation, and municipal needs including the amounts sold to the population and retail trade through fuel filling stations

## ENERGY

**16.2. GDP energy intensity**

	2010	2015	2017	2018	2019	2020
GDP by the 2017 <sup>1</sup> purchasing power parity, bln. of international dollars	540,3	481,5	504,4	521,5	538,4	516,7
<b>Final energy supply</b>						
Final energy supply, thsd.t of oil equivalent	74004	50831	49911	51408	49665	47821
<b>Energy intensity</b> , t of oil equivalent/thsd. of international dollars by the 2017 purchasing power parity	<b>0,137</b>	<b>0,106</b>	<b>0,099</b>	<b>0,099</b>	<b>0,092</b>	<b>0,093</b>
<b>Total primary energy supply</b>						
Total primary energy supply, thsd.t of oil equivalent	132308	90090	89462	93526	89359	86402
<b>Energy intensity</b> , t of oil equivalent/thsd. of international dollars by the 2017 purchasing power parity	<b>0,245</b>	<b>0,187</b>	<b>0,177</b>	<b>0,179</b>	<b>0,166</b>	<b>0,167</b>

<sup>1</sup> Gross Domestic Product (GDP) at purchasing power parity (PPP) is published according to the *World Bank*, which since 2019 introduced the publication of data on PPP prices in international dollars in 2017 and revised the relevant data for previous years

**16.3. Structure of the consumed fuel in 2020, by purpose**

(percent)

	Usage <sup>1</sup>	Of which			
		for conversion to other fuels and energy	for non-energy purposes	final use <sup>1</sup>	distribution, transportation and storage losses
<b>Total</b>	<b>100,0</b>	<b>51,6</b>	<b>4,8</b>	<b>42,6</b>	<b>1,0</b>

## 17. INDUSTRY

**Index of industrial products** is produced in line with international standards according to the Technique approved by decree № 224 of the State Statistics Committee of Ukraine dated on August 2, 2005 (with changes by the decrees № 91 of the State Statistics Service of Ukraine dated on March 14, 2013 and № 61 of January 23, 2020).

The base formula for compiling the Laspeyres volume index. The index compilation is based on data on production progress according to a fixed set of representative goods (more than thousands of items) and the structure of gross value added over the base year. Since 2010 in Ukraine (since 2013 by region) index is produced by type of activity in sections B, C, D (apart from group 35.3) and in line with the *Classification of Types of Economic Activity* (State Classifier 009:2010).

The index compilation in Ukraine prior to 2007 (by region before 2009) is based on

the chain-linked method on the basis of the monthly indices calculated using the data from enterprises on the value of output over the month at comparable prices.

Over the extended periods, industrial production indices are compiled using the chain-linked method, i.e. by multiplying the indices over the previous year for the needed period.

The production of industrial products by type is shown on the gross output, including the products to be further processed within one enterprises and the products produced for enterprise's own needs.

Information on products production is given according to the Nomenclature of Industrial Products (NIP) which is harmonized with the Statistical Classification of Products by Type of Economic Activity of the European Union (EU), based on the List of Industrial Products for the EU (PRODCOM) and takes into account energy products.

### 17.1. Industrial production indices, by type of activity

(percent of the previous year)

	2010	2015	2017	2018	2019	2020	2021
<b>Industry</b>	<b>112,0</b>	<b>87,7</b>	<b>101,1</b>	<b>103,0</b>	<b>99,5</b>	<b>95,5</b>	<b>101,9</b>
Mining and manufacturing	112,3	87,9	102,4	103,0	100,2	95,0	102,1
Mining and quarrying	104,5	89,8	96,5	103,4	98,4	97,0	101,4
Mining of coal and lignite	98,4	63,7	83,2	106,1	96,9	86,3	107,0
Extraction of crude petroleum and natural gas	92,5	96,9	101,8	102,5	100,3	98,1	97,8
Mining of metal ores	113,8	92,5	91,5	104,4	97,1	97,6	102,5
Other mining and quarrying	113,8	86,5	110,2	101,2	91,6	103,2	121,1
Manufacturing	116,2	86,9	105,2	102,9	100,9	94,1	102,4
Production of foodstuffs, beverages and tobacco products	103,7	89,1	106,3	98,7	103,3	99,2	94,6

Rubber hose assemblies, thsd.t	0,3	0,6	0,6	0,5	0,6	0,6
Other plates, sheets, film, foil and strip, of polymers of ethylene, not reinforced, thickness ≤ 0,125 mm, thsd.t	73,8	81,1	82,4	85,7	82,7	76,5
Other plates, sheets, film, foil and strip, of polymers of ethylene, not reinforced, etc, thickness > 0,125 mm, thsd.t	19,3	18,0	18,9	27,9	25,9	24,3
Other plates, sheets, film, foil and strip, of biaxially orientated polymers of propylene, thickness ≤ 0,10 mm, thsd.t	20,6	18,0	12,5	10,4	8,3	8,5
Other plates, sheets, film, foil and strip, of polymers of styrene, not reinforced, etc, thsd.t	22,5	23,5	24,9	23,1	27,1	25,7
Plates, sheets, film, foil and strip, of non-cellular plastics, n.e.c., not reinforced, laminated, supported or similarly combined with other materials (excluding self-adhesive products, floor, wall and ceiling coverings of HS 3918 and sterile surgical or dental adhesion barriers of CN 3006 10 30), thsd.t	25,1	32,1	33,1	31,7	c	c
Sacks and bags (including cones), of polymers of ethylene (excluding of synthetic fibres), thsd.t	47,5	54,9	61,5	74,6	73,5	69,7
Plastic doors, windows and their frames and thresholds for doors, mln.pcs	2,3	3,3	3,2	3,1	3,2	2,8
Tableware and kitchenware of plastic, thsd.t	7,3	8,0	8,4	8,8	9,4	9,2
Household articles and toilet articles, of plastics (excluding tableware, kitchenware, baths, shower-baths, washbasins, bidets, lavatory pans, seats and covers, flushing cisterns and similar sanitary ware), thsd.t	5,8	7,8	8,7	11,4	10,5	9,5
<b>Production of other non-metallic mineral products</b>						
Multiple-walled insulating units of glass, mln.sq.m	2,1	2,7	2,6	2,8	2,9	2,8
Glass preserving jars, stoppers, lids and other closures (including stoppers and closures of any material presented with the containers for which they are intended), thsd.t	164,3	216,5	172,9	219,8	279,3	280,1
Bottles of colourless glass of a nominal capacity < 2,5 l, for beverages and foodstuffs (excluding bottles covered with leather or composition leather, infant's feeding bottles), bln.pcs	1,2	1,4	1,4	1,5	1,5	1,6
Refractory ceramic constructional goods containing >50% of MgO, CaO or Cr <sub>2</sub> O <sub>3</sub> including bricks, blocks and tiles excluding goods of siliceous fossil meals or earths, tubing and piping, thsd.t	53,4	63,7	61,2	58,1	c	c
Refractory bricks, blocks, tiles and similar refractory ceramic constructional goods containing, by weight, > 7% but < 45% alumina, but > 50% by weight combined with silica, thsd.t	138,0	162,5	162,0	163,9	c	c
Ceramic slabs and tiles, mln.sq.m	44,7	52,3	54,5	49,9	46,6	50,4

INDUSTRY

Table 17.12 continued

	2015	2017	2018	2019	2020	2021 <sup>1</sup>
Non-refractory clay building bricks (excluding of siliceous fossil meals or earths), mln.cub.m	2,2	2,1	2,0	1,9	1,7	1,5
Porcelain or china tableware and kitchenware (excluding electro-thermic apparatus, coffee or spice mills with metal working parts), thsd.t	1,0	1,5	1,3	0,7	c	—
Portland cement, mln.t	c	9,0	8,9	9,1	9,6	10,8
Other hydraulic cements, mln.t	c	0,3	0,3	0,1	c	...
Quicklime, mln.t	2,5	2,2	2,3	2,2	2,3	2,3
Slaked lime, mln.t	0,2	0,3	0,3	0,2	0,1	0,1
Blocks and bricks of cement, artificial stone or concrete meant for building, mln.t	3,4	3,7	3,6	3,4	3,4	3,5
Elements (cement, concrete or artificial stone) of prefabricated structures for construction, mln.t	4,4	4,8	4,6	4,2	3,9	3,9
Ready-mixed concrete, mln.t	12,5	18,5	18,9	19,0	18,7	19,6
Factory made mortars (except concrete solutions ready for use), mln.t	1,6	2,2	2,4	2,4	3,6	4,3
Articles of asbestos-cement, of cellulose fibre-cement or similar mixtures of fibres (asbestos, cellulose or other vegetable fibres, synthetic polymer, glass or metallic fibres, etc.) and cement or other hydraulic binders, containing asbestos, thsd.t	132,9	163,3	147,6	114,8	105,6	c
Articles of asphalt or of similar materials, e.g. petroleum bitumen or coal tar pitch, in rolls, mln.sq.m	27,8	39,1	38,3	21,0	25,7	23,3
Slag wool, rock wool and similar mineral wools and mixtures thereof, in bulk, sheets or rolls, thsd.t	177,0	182,4	190,7	235,9	c	c
<b>Manufacture of basic metals</b>						
Pig iron and spiegeleisen in pigs, blocks or other primary forms, mln.t	21,9	19,8	20,5	20,1	20,2	20,8
Ferro-silico-manganese, thsd.t	750,2	875,0	912,3	858,7	c	c
Ferro-nickel, thsd.t	95,2	74,5	79,5	79,3	c	c
Flat semi-finished products (of non-alloy steel), mln.t	8,3	9,1	9,3	9,4	10,1	c
Ingots, other primary forms and long semi-finished products for seamless tubes (of non-alloy steel), mln.t	7,9	7,2	6,7	6,6	c	c
Other ingots, primary forms and long semi-finished products including blanks (of non-alloy steel), mln.t	8,0	5,0	5,3	4,9	5,0	c
Flat semi-finished products (slabs) (of stainless steel), thsd.t	0,5	0,7	0,5	0,3	c	c
Ingots, other primary forms and long semi-finished products for seamless tubes (of stainless steel), thsd.t	100,8	99,2	103,3	91,4	c	c
Other ingots, primary forms and long semi-finished products (of stainless steel), thsd.t	20,2	18,8	18,2	18,4	c	c
Flat semi-finished products (of alloy steel other than of stainless steel), mln.t	1,0	1,1	1,2	1,3	c	c
Ingots, other primary forms and long semi-finished products for seamless tubes (of alloy steel other than of stainless steel), mln.t	3,6	4,0	3,7	3,4	1,0	1,1
Other ingots, primary forms and long semi-finished products (of alloy steel other than of stainless steel), mln.t	0,4	0,6	0,9	0,9	1,6	2,5
Casing, tubing and drill pipe, of a kind used in the drilling for oil or gas, seamless, of steel other than stainless steel, thsd.t	94,3	176,0	222,0	151,7	c	c
Tubes and pipes, of circular cross-section, hot-finished, seamless, of steel other than stainless steel (excluding line pipe of a kind used for oil or gas pipelines and casing, tubing and drill-pipe used for oil or gas drilling), thsd.t	278,9	329,3	380,3	387,7	c	c

INDUSTRY

Table 17.12 continued

	2015	2017	2018	2019	2020	2021 <sup>1</sup>
Tubes and pipes, of circular cross-section, hot- or cold-formed and welded, of an external diameter ≤ 406,4 mm, of steel other than stainless steel, thsd.t	224,6	156,8	158,8	140,2	164,1	141,8
Tubes and pipes, of square or rectangular cross-section, of a wall thickness ≤ 2 mm, hot- or cold-formed and welded, of steel other than stainless steel, thsd.t	66,1	222,4	181,9	208,0	224,0	170,3
Tubes and pipes, of square or rectangular cross-section, of a wall thickness > 2 mm, hot- or cold-formed and welded, of steel other than stainless steel, thsd.t	149,1	173,2	192,3	151,8	135,3	123,2
Cold-formed sections, obtained from flat products, of non-alloy steel, coated with zinc, thsd.t	101,1	125,6	104,2	98,2	105,4	111,3
Cold-profiled (ribbed) sheets, of non-alloy steel, thsd.t	117,6	165,0	164,0	156,9	172,8	164,7
Iron or non-alloy steel wire containing < 0,25% of carbon including crimping wire excluding stranded wire, barbed wire used for fencing - duplex wire - saw-tooth wire, insulated electric wire, thsd.t	178,1	203,9	191,9	203,4	213,0	232,5
Iron or non-alloy steel wire containing 0,25-0,6% of carbon including crimped wire excluding stranded wire, barbed wire used for fencing, duplex wire, saw-tooth wire, insulated electric wire, thsd.t	43,9	55,8	31,0	30,2	31,5	21,3
Iron or non-alloy steel wire containing ≥ 0,6% of carbon including crimping wire excluding stranded wire, barbed wire used for fencing, duplex wire, saw-tooth wire, insulated electric wire, thsd.t	42,5	42,0	56,0	62,9	c	c
Prefabricated buildings, of iron or steel, thsd.t	45,4	73,8	69,2	71,2	61,0	67,2
Iron or steel equipment for scaffolding, shuttering, propping/pit-propping including pit head frames and superstructures, extensible coffering beams, tubular scaffolding and similar equipment, thsd.t	56,5	69,5	86,1	86,3	84,2	73,0
Other structures principally of sheet: other, thsd.t	64,4	103,3	122,4	152,0	136,0	157,5
Weirs, sluices, lock-gates, landing stages, fixed docks and other maritime and waterway structures, of iron or steel, structures and parts of structures of iron or steel, n.e.s. (excluding bridges and bridge-sections; towers; lattice masts; gates; doors, windows and their frames and thresholds; equipment for scaffolding, shuttering, propping or pit-propping, and structures and parts of structures not manufactured exclusively or mainly from plate), thsd.t	101,4	143,4	164,7	187,9	87,4	71,2
Central heating radiators and parts thereof without electric heating produced from ferrous metals, thsd.t	2,5	8,2	16,5	16,0	c	c
Boilers for central heating other than those of HS 8402, thsd.pcs	249,2	187,8	170,7	153,1	98,7	98,1
Iron or steel reservoirs, tanks, vats and similar containers for liquids, of a capacity > 300 litres (excluding fitted with mechanical or thermal equipment, lined or heat insulated), thsd.t	6,2	9,5	8,3	8,8	7,3	5,8
Iron or steel reservoirs, tanks, vats and similar containers for solids, of a capacity > 300 litres (excluding fitted with mechanical or thermal equipment), thsd.t	2,2	10,5	15,1	12,5	12,7	15,8
Super-heated water boilers (excluding central heating hot water boilers capable of producing low pressure steam), thsd.pcs	3,5	1,5	c	2,3	c	...

INDUSTRY

*Table 17.12 continued*

	2015	2017	2018	2019	2020	2021 <sup>1</sup>
Iron or steel hexagon bolts with heads, with a tensile strength < 800 MPa (excluding of stainless steel), thsd.t	9,6	8,9	8,1	5,4	c	c
Iron or steel hexagon bolts with heads, with a tensile strength ≥ 800 MPa (excluding of stainless steel), thsd.t	2,5	5,1	4,3	3,0	c	c
Iron or steel nuts (including self-locking nuts), thsd.t	8,0	8,0	5,7	3,0	c	c
Threaded articles, n.e.c., of iron or steel, thsd.t	1,3	3,9	5,5	5,3	4,3	4,9
Table, kitchen or household articles and parts thereof of iron other than cast iron, or steel other than stainless (excluding enamelled), thsd.t	11,0	13,3	13,8	13,6	c	c
<b>Engineering</b>						
Photosensitive semiconductor devices; solar cells, photo-diodes, photo-transistors, etc, mln.pcs	0,9	0,01	0,01	0,2	c	c
Multilayer printed circuits, consisting only of conductor elements and contacts, mln.pcs	1,0	0,6	0,5	0,3	c	c
Printed circuits consisting only of conductor elements and contacts (excl. multiple printed circuits), mln.pcs	1,2	1,3	1,0	0,6	c	c
Passive networks (including networks of resistors and/or capacitors) (excluding resistor chip arrays, capacitor chip arrays, boards containing active components, hybrids), mln.pcs	1,2	3,1	3,1	3,5	3,0	4,0
Machines for the reception, conversion and transmission or regeneration of voice, images or other data, (including switching and routing apparatus), thsd.pcs	31,9	238,4	180,6	123,1	140,4	c
Thermometers, liquid-filled, for direct reading, not combined with other instruments (excluding clinical or veterinary thermometers), mln.pcs	2,6	3,6	2,8	2,6	c	c
Non-electronic hydro-, hygro-, psychrometers (including hygrographs, thermo-hygrographs, baro-thermo-hygrographs, actinometers, pagoscopes; excluding radio-sondes for atmospheric soundings), mln.pcs	1,4	1,4	2,1	1,7	c	c
Other non-electronic instruments and apparatus for physical or chemical analyses, n.e.c., thsd.pcs	279,8	268,7	282,8	179,9	c	...
Gas supply or production meters (including calibrated), thsd.pcs	806,6	615,1	367,4	445,9	394,3	c
Liquid supply or production meters (including calibrated) (excluding pumps), mln.pcs	1,6	1,5	1,1	0,9	0,8	c
Electricity meters (including calibrating (excluding voltmeters, ammeters, wattmeters, etc), mln.pcs	0,8	0,9	0,9	1,0	1,0	c
Automatic regulating or controlling instruments and apparatus, hydraulic or pneumatic, thsd.pcs	7,8	25,6	3,4	7,1	5,1	...
Instruments and apparatus, regulating or controlling, n.e.c., thsd.pcs	61,1	93,7	109,0	116,1	115,2	110,3
DC motors and generators of an output > 37,5 W but ≤ 750 W (excluding starter motors for internal combustion engines), thsd.pcs	10,5	11,6	10,4	0,6	6,1	c
DC motors and DC generators of an output > 750 W but ≤ 75 kW (excluding starter motors for internal combustion engines), thsd.pcs	4,9	2,0	2,7	0,5	0,4	0,3
Single-phase AC motors of an output ≤ 750 W, thsd.pcs	64,2	63,4	54,0	36,7	38,0	c
Multi-phase AC motors of an output ≤ 750 W, thsd.pcs	127,0	123,2	96,7	54,4	c	...
Multi-phase AC motors of an output > 0,75 kW but ≤ 7,5 kW, thsd.pcs	27,3	27,2	17,0	12,9	c	c

INDUSTRY

## 18. AGRICULTURE, HUNTING, FORESTRY. FISHERY

This section presents information about agriculture, hunting, forestry and fishery.

**Index of agricultural products** reflects the changes in physical volume of agricultural production produced over the periods selected for comparisons.

**Enterprise** is a business entity with right of legal person or an independent unit of legal person that performs systematic economic activity in agriculture. Farms are also put into enterprises.

**Agricultural holdings of households** are households that carry out agricultural activity both to provide themselves with foodstuffs and produce marketable agricultural products. This category of producers also includes natural persons-entrepreneurs who undertake their activities in the area of agriculture.

**Profitability of agricultural production** is compiled as a ratio of profit/loss from sales agricultural products to its full self-cost.

**Average price for the agricultural products sold by enterprises** is the average unit value (tones, thsd. units) of the sold own production products given its quality but excluding tax on value added, grants, overhead costs, transport and forwarding charges that is calculated by dividing the products sold over the relevant period by its quantity. In 2000/2011, the average price included the sum of grants at the expense of funds of tax on value added and budget grants; since 2012 it is not included.

**Agricultural lands** are land plots systematically used to obtain agricultural products. Their composition includes arable land (including bare fallow), idle land, perennial plantings, hay land, pastures.

**Agricultural lands area owned and used by enterprises** are land plots systematically used to obtain agricultural products. The agricultural lands area composition includes arable land, fallows, perennial plantings, hay land, pastures.

**The revised sown are of agricultural crops** is the area that was actually occupied by agricultural crops in the spring (area under winter crops which were preserved and area under spring crops) including the sowing of late crops for the current year harvest (summer plantings) as well as changes in the use of crops (transition of crops from groups of one production direction to others, for example, for grain, green fodder, hay, etc).

**Area under perennial plantings** is the total area occupied by separate gardens, patches of berries, vineyards and other perennial plantings and the area under trees and bushes that grow separately regardless of the age of plantings.

**Area under perennial plantings at a fruitful age** is the area under gardens, patches of berries, vineyards and other perennial plantings which have reached the fruit bearing age.

**Area with the harvested agricultural crops** is the area where the activities related to collecting agricultural crops harvest were performed.

**Volume of production (gross harvest) of agricultural crops** is the total amount of products collected from the main, repeated and inter-row plantings. Volume of production (gross harvest) of grain and leguminous and sunflower crops is given in the mass after completion, sugar beets (factory) in the mass without land and admixture, vegetable crops include the closed soil products.

**Yield of agricultural crops** is an average size of certain crop produce obtained from a unit of actually harvested area. It is calculated as a ration of gross harvest from principle, secondary and between row sowing area and actual harvested area of a given crop.

**Volume of production (gross harvest) of perennial crops out of the total area of plantings** is the total amount of products harvested from perennial plantings regardless of their age.

**Yield of perennial plantings** is an average size of certain products of perennial plantings. It is calculated as a ratio of gross harvest from total area under perennial plantings and planted area under this crop in fruit bearing age.

**Volume of the applied fertilizers** is the mass of mineral (in terms of 100% of active substances) and organic (in physical mass) fertilizers applied to the soil to improve the nutritional conditions and increase the yields of agricultural crops.

**Volume of the applied pesticides** is the mass (in active substances) of the pesticides applied to protect agricultural crops from pests.

**Area treated with fertilizers/pesticides** is the area with the applied fertilizers (mineral, organic), pesticides used for harvest of agricultural crops of reference year.

**Volume of the applied fertilizers/pesticides per 1 ha of the sown revised/cultivated area** is the average indicator characterizing fertilizers and pesticide applied to the soil per unit of area. It is calculated as a ratio of the applied mineral fertilizers in terms of 100% of active substances, organic fertilizers in physical mass and used pesticides in terms of active substance which were used for certain agricultural crop to the sown revised/cultivated area under this crop.

**Part of area treated with fertilizers/pesticides** is a ratio of area with the applied fertilizers/pesticides to the sown revised area under certain agricultural crop.

**Population of livestock animals** is the indicator characterizing the availability of livestock animals of the relevant type (total or by sex and age group) as of reporting date.

**Meat production (in the slaughter weight) or slaughter weight of agricultural animals sold for slaughtering** is the product of the total live weight of agricultural animals sold for slaughtering and the coefficient for converting the live weight of animals into slaughter weight.

**Milk production (gross yield)** is the overall volume of actually milk yield taken from cows of all breeds, buffalo cows, sheep

and goats, mares, other dams of livestock animals.

**Wool production (gross amount of wool shorn)** of all kinds is the overall actual volume of wool shorn from live sheep and goats including wool that was used to intra-farm needs.

**Eggs production from poultry** is the overall number of eggs obtained from all kinds of poultry including the losses due to breakage, spoiling, etc as well as eggs spent for young birds reproduction (incubation) by hens or in hatchers.

**Average milk yield from one cow** is a ratio of cow milk production (gross yield) to the relevant number of uterus cow at the beginning of reference year.

**Average wool shorn from one sheep** is a ratio of sheep wool production (gross wool shorn) to the number of sheep at the beginning of the year.

**Volume of production of main types of plant/animal products per person** is a ratio of production (gross harvest) of certain type plant products/production of certain type of animal products to the average annual number of available population for the reference year.

**Hunting areas** are the land and waters (forest, fields, meadows, swamps, lakes, etc) which are inhabited with animals that could be used for hunting or game shooting and catching.

**Hunting animals** are the wild beasts and birds that could be huntable species.

**The value of the sold forest products** is defined at the price of forestry finished products shipped outside the enterprise. It is mentioned in the documents issued as a basis for the settlements with a customers/clients (including the products according to the barter contracts) excluding value added tax.

**Round timber** is the total volume of the fallen or otherwise cut and taken away timber that can be used for economic purpose.

**Low-grade wood** is round timber used as fuel for cooking, heating or producing energy. This term also includes wood used for production of charcoal, wood pallets and other agglomerates, wood chips that were directly

obtained in the forests from round timber and are subject to using as fuel.

**Test felling and forest rehabilitation** and other felling are a periodical felling of a part of the planted trees and bushes which are made since the beginning of planting, but before the main felling, to make the necessary storage, and improve planting.

**Timber harvesting** is a clear-cutting of ripe trees on a special parcel of forest in order to obtain wood. It also includes the felling of some trees planted for the purpose of cultivation and protection of the forest, and procurement of wood when cleaning blocked forest trails.

**Main felling** is felling of ripe trees in order to procure the timber.

**Forest restoration** is the work dealing with the improvements to forests on forest compartments covered with forest vegetation (timber blocking, burned areas, etc) and forest planting in the lands of agricultural purpose not covered by the forest vegetation.

**Forest protection against infestations and diseases** is ensured through systematic observation over the forests status, timely detection of the forest infestations and diseases, prophylactics of these core areas, their location and liquidation.

**Volume of harvesting of water bio-resources** is the volume of fish and other water bio-resources extracted from all fishery water bodies or other parts (sees, oceans, ponds, rivers, water reservoirs, lakes and other water basins) both to sell to re-processors, trade organisations, etc and also to further process them at the own enterprise regardless of the purpose of their further usage: production of food, technical, feed, medical and other types of products. At the enterprises engaged in pond fish farming, the volume of catch live pond fish also includes the fish that have been re-weighted and transferred from fishing pond to winter ponds.

## AGRICULTURE, HUNTING, FORESTRY. FISHERY

**18.8. Distribution of enterprises<sup>1</sup> engaged in agricultural activity in 2021,  
by size of agricultural lands**

	Number of enterprises		Area of agricultural lands	
	units	percent of the total number	thsd.ha	percent of the total area of agricultural land
Enterprises that have agricultural lands	39301	100,0	20822,8	100,0
including with the area, ha				
under 5,00	1766	4,5	5,8	0,0
5,01–10,00	1827	4,7	14,3	0,1
10,01–20,00	3036	7,7	47,2	0,2
20,01–50,00	9460	24,1	353,4	1,7
50,01–100,00	5167	13,2	373,5	1,8
100,01–500,00	9371	23,8	2290,3	11,0
500,01–1000,00	3228	8,2	2314,1	11,1
1000,01–5000,00	4845	12,3	10150,4	48,8
over 5000,00	601	1,5	5273,8	25,3

<sup>1</sup> Data are presented by units which actually submitted report by form 4-cr (annual) *Report on cultivated areas for agricultural crops* and meet the criteria defined by statistical methodology

**18.9. Structure of production cost of agriculture products (operations, services)  
by enterprises<sup>1</sup>**

(percent)

	Products (operations, services) of agriculture				
	2017	2018	2019	2020	2021

## 19. CONSTRUCTION

The **construction work**, according to *the Classification of Types of Economic Activity*, State Classifier 009:2010, include general and specialised construction work of buildings and structures. This activity includes new construction, repair operations and reconstruction, construction of buildings and prefabricated structures on the site of operations as well as construction of temporary objects (Section F *Construction*).

**Indices of construction produce** are produced in line with international

standards by the Technique approved by SSSU decree 224 of August 2, 2005 (with changes by the decrees № 91 of the State Statistics Service of Ukraine dated on March 14, 2013 and № 61 of January 23, 2020).

**Residential buildings** includes dwelling: single-family house, houses with two and more apartments and boarding **houses** (including old people's homes, student's hostels and others, e.g. refugee's hostels, hostels for workers and employees, orphanages, homes for the homeless etc).

### 19.1. Indices of construction output

(percent of the previous year)

	2015	2017	2018	2019	2020	2021

## 20. CAPITAL INVESTMENT

**Capital investment** is expenditure for an acquisition or production (creation) of tangible and intangible non-current assets. The calculation of investment per capita is made on the basis of average annual resident population.

**Investment into tangible assets** is investment into residential buildings, non-residential buildings, engineering structures, machines, equipment and tools, transport facilities, land, long-term biological assets of animal breeding and crop farming other tangible assets.

**Investment into intangible assets** is investment into an acquisition or creation

using one's own resources of the rights to use natural resources and property, software and databases, the rights for commercial brands, subjects of industrial property, copyrights and related rights, patents, licences, concessions, etc.

The calculation of investment per capita is made on the basis of average annual resident population.

**Capital investment index** is produced in line with the Technique to compile capital investment index approved by SSSU order No 303 of December 10, 2021.

## 21. TRANSPORT

**Freight shipped** is the total quantity of goods expressed in tons (gross), shipped.

**Freight transported** refers to the total freight loaded and shipped by selected type of carrier (trucks, railway coaches, sea and river vessels and aeroplanes) or pipelines. Freight is measured in tons (pumping of gas or ammonia is measured in tons or cubic meters).

**Freight turnover** is the sum of the weight products transported (relocated) cargo (gross) by the distance of transportation (relocation) for each consignment of cargo (measured in tonne-kilometers).

**Passengers carried** is the total number of passengers admitted for transport.

**Transport passengers** is the total number of passengers transported by category of carrier (busses, motor cars, trolley buses, trams, passenger railway coaches, sea and river vessels and airplanes).

**Passenger turnover** is the sum of the products of the number of passengers carried

by the distance of transportation for each trip (measured in passenger-kilometers).

**Intracity transport** refers to passenger transportation within the boundaries of an inhabited locality.

**Commuter transport** includes passenger transportation by routes, the length of which does not exceed 50 km regardless of administrative division apart from city routes.

**Long-distance transport** refers to passenger transportation by routes, the length of which exceed 50 km and which are within boundaries of the Autonomous Republic of Crimea, region (inter-oblast) or are outside the Autonomous Republic of Crimea, region (interregional).

**Average distance of transport** is defined by dividing freight and passenger traffic by the quantity of shipped freight and transported passengers respectively.

## 22. FOREIGN ECONOMIC ACTIVITY

Statistics of **foreign trade in goods** are compiled on the basis of the information of the State Customs Service of Ukraine adjusted for the total amount of oil and natural gas, fish caught in international waters and goods purchased in foreign ports. The data on exports in goods are recorded by country of destination whereas the data on imports by country of origin.

**Country of destination** refers to the country identified at the moment of loading as the final country to which goods are to be delivered.

The country where goods were produced or processed is considered the **country of origin**.

The goods are valued in national currency. Conversions into USD are made according to the date the customs

declaration was completed and the official exchange rate of the National Bank of Ukraine (NBU) fixed for that particular date. According to enterprise reports, conversions into the USD are made according to the monthly and quarterly average exchange rates.

Statistical information about **foreign trade in services** is compiled using data from enterprises-legal persons, permanent missions of non-residents to Ukraine, central and local bodies of executive power, chief controllers of the state and local budgets who effected exports/imports operations of services.

Services are valued using the contract currency. Conversions into USD and national currency are made using the official average quarterly exchange rate set on the basis of the NBU daily exchange rates.

Services rendered to individual persons, cultural and recreation services	49,3	0,4	21,8	0,3
State and government services	9,3	0,1	1098,1	13,8

## 23. DOMESTIC TRADE

**Wholesale turnover** is resale (sale without processing) by legal persons whose main type of activity is wholesale trade (hereinafter, the wholesalers) on behalf of their name of the new or consumed goods (finished products) at the moment of their dispatch, purchasing on one's own account without any changes (apart from conventional trade-related operations: weighting, sorting of large lots of goods, packing, dividing into lots, distributing, stacking, mixing, etc) to retailers, enterprises and organizations or other wholesalers (apart from the population) to be used or further sale within Ukraine and for exports. Wholesale turnover excludes VAT.

**Turnover of retail trade** is a summarized measure which consists of retail turnover of legal persons (hereinafter, the retailers) and natural persons-entrepreneurs whose main type of economic activity is retail trade.

The indicator is calculated in accordance with the Methodology for calculating the turnover of retail trade, taking into account the activities of individual entrepreneurs, approved by the order of the State Statistics Service dated 04.04.2016 № 53, starting from 2017.

**Retail turnover** is a part of the turnover of enterprises by type of economic activity retail trade, which includes income from the resale mainly to the population of new or used goods (for cash, bank payment cards, etc) as in in-store and out-of-store, including value added tax.

The **index of the physical volume** of retail trade turnover or retail trade turnover is calculated on the basis of the Methodological recommendations for calculating the indices of the physical volume of retail trade turnover, approved by the order of the State Statistics Committee of 06.11.2000 № 353.

## 24. INFORMATION SOCIETY

**Website** is a set of webpages united by contents accessible on the Internet. Information is coded using special languages (language to describe hypertext documents (HTML, XML, Java)) that are read with the help of Web information systems for navigation and browsing such as Microsoft Internet Explorer, Opera, Mozilla Firefox, etc.

**The services of cloud-based calculations** are supplied (rented) from servers of services providers and permit consumers, from any computer with access to the Internet, to use the software, computer power, disk-related space, etc. for data remote processing and preservation.

**Electronic commerce** is an economic activity in the sphere of electronic buying/selling, distance sale of goods to customer by making electronic transactions through the use of information and telecommunication systems.

**Volume of the sold products (goods, services)** is defined according to the sale price for the finished products (goods, services) shipped outside an enterprise and which is mentioned in the documents issued as a basis for settlement with buyer/customer (including products (goods, services) according to the barter contract) less VAT.

**The number of employees** is defined by taking into account the regular employees, contractors, and unpaid (owners, founders of enterprise and their family members) employees of enterprises.

Since 2021, in line with the updated methodology, the calculation of indicators on the number and share of enterprises that used information and communications technologies is made for the year during which the state statistical observation *Usage of information and communications technologies at enterprises* is undertaken.

## 25. ACTIVITY OF ENTERPRISES

The section contains information on the basic statistical indicators, which characterise conditions and tendencies for development of business entities, which covered enterprises-legal persons and natural persons-entrepreneurs.

**The enterprise-legal person (further – the enterprise)** – the independent business entity created by competent body of the government authority or local administration or other economic player to satisfy public and personal requirements by regular performance of production, research, trade or other economic activities according to the order stipulated by the *Business Code of Ukraine* and other laws. The enterprise does not incorporate other legal persons, but has the right to create subsidiaries, representations, branches and other separated subdivisions, which have no status of the legal person.

**The natural person-entrepreneur** – a natural person registered under a stated order with the purpose to realize an entrepreneurial activity.

Statistical data for 2010, 2015/2020 regarding the basic indicators of enterprises' activities by their size are compiled using the criteria for large, middle-sized, small and micro enterprises specified in the *Business Code of Ukraine* as worded as of March 22, 2012, namely:

**micro enterprises** are entities of any organisational and legal form and form of ownership where during the reference period (calendar year) the average number of employees does not exceed 10 persons and the annual revenue from any activity does not exceed a sum equal to 2 million euros fixed by

period (calendar year) the average number of employees does not exceed 50 persons and the annual revenue from any activity does not exceed a sum equal to 10 million euros fixed by the average annual rate of the National Bank of Ukraine;

**large enterprises** are entities of any organisational and legal form and form of ownership where during the reference period (calendar year) the average number of employees does not exceed 250 persons and the annual revenue from any activity exceed a sum equal to 50 million euros fixed by the average annual rate of the National Bank of Ukraine;

**middle-sized enterprises** are other entities.

**Number of persons employed workers** includes regular employees, those not on the permanent staff and unpaid (owners, founders of an enterprises and members of their families) employees of an enterprise.

**Number of employees** incorporates regular employees and those not on the permanent staff (working under contracts and in more than one job) at an enterprise.

**Volume of sold products (goods, services)** is calculated using the prices of final products (goods and services) shipped outside the business that is mentioned in the processed documents which are used as a framework for settlement with a customer (client) (including products (goods, services) by barter contracts) less indirect tax on value added.

**Assets** are resources controlled by an enterprise as a result of the past events and whose uses, as expected, will lead to the acquisition of economic benefits in the future.

## ACTIVITY OF ENTERPRISES

---

**Liabilities** are arrears of an enterprise that resulted from the past events and whose debt service in the future will lead to decrease in enterprise's resources that embody the economic benefits.

**Equity capital** is the difference between the enterprises' assets and liabilities.

**Financial outcome before taxation (profits, losses)** is an algebraic sum of profits (losses) that an enterprise received from operating activity, financial and other income (profit), financial and other expenditure (losses).

**Rate profitability of operating activity** is a ratio of financial outcome stemming from

operating activity to expenditure on operating activity of the enterprises.

**Financial outcome from operating activity (profits, losses)** is an algebraic sum of gross profit (loss), other operating income, administrative expenditures, expenditure on sales and other operating expenditures.

**Operating activity** is the main activity of an enterprise as well as other types of activities which are neither investment or financial.

Information for 2021 has been compiled including data from initiatives submitted reports of enterprises.

The information is given excluding the performance of budget institutions.

## 26. SCIENCE AND INNOVATIONS

The section includes the indicators characterizing the organisations' (enterprises') activity regarding the R&D performance and innovation activity of Ukraine's industrial enterprises. Also, it takes into account the activity of universities, state and non-profit research organisations.

**R&D** refers to fundamental, applied scientific and scientific and technical (experimental) developments.

**Fundamental R&D** are the theoretical and experimental R&D targeted to obtain the new knowledge about the regularities to organize and develop the nature, society, human being, their relationships. The result of the fundamental R&D are the hypotheses, theories, new methods of perception, the opening of nature laws, the phenomena and matter properties unknown before, regularities exposure of household development, etc that are not oriented toward direct practical usage in the sphere of economy.

**Applied R&D** are the theoretical and experimental R&D targeted to obtain and employ the new knowledge for practical purposes. The result of the applied R&D is the new knowledge targeted to create the new materials or improve the existing ones, as well as products, devices, methods, systems, technologies, concrete proposals on performance of relevant scientific and technical, and social tasks.

**Scientific and technical (experimental) developments** are the scientific and technical activity based on scientific knowledge that is obtained as a result of scientific research and practical experience. It is implemented in order to bring this knowledge to the stage of practical usage. The result of the scientific and technical (experimental) developments is the

new or significantly improved materials, products, processes, devices, technologies, systems, intellectual property rights, new or significantly improved services.

**Spending for R&D performance** is the general sum of spending for R&D performance using organisation's own resources. The spending includes internal current expenses (labour costs, material costs, other current expenses) and capital costs related to the implementation of R&D.

**The R&D performers** are researchers, technicians and supporting staff from independent scientific and research, design, drawing-and-designing organisations as well as employees of laboratories or separate units at tertiary educational institutions or enterprises whose main activity is R&D performance.

**Researchers** are the scientific and engineers who are professionally engaged into the scientific research and developments and are directly involved into the creation of the new knowledge, products, processes, methods and systems as well as administrative and managerial staff that directly manage the research process (including the chiefs of scientific organisations and units that perform R&D). Researchers, as a rule, have tertiary education of the second, third or scientific level (in line with Ukraine's law *On tertiary education*). Researchers can also include the post-graduate students and doctoral students.

**Technicians** are the workers whose main functions require the possession of technical knowledge and experience in one or some spheres of the natural, technical, social or humanitarian sciences and who participate in the R&D performance by performing technical functions under the supervision of researchers (software development;

bibliographical retrieval and selection of the relevant materials from archives and libraries; accomplishments of experiments, trials and analysis; measurement registration, the making of the calculations, preparation of the drawings and schemes; the undertaking of statistical surveys, etc). Technicians can have tertiary education starting from the beginner level and up to the third level (in line with Ukraine's law *On tertiary education*).

**Auxiliary personnel** are workers who perform the auxiliary functions connected with R&D performance: workers of planning and economic, financial units, patent offices, units of scientific and technical information, scientific and technical libraries; workers dealing with assembly, checkout, servicing and repair of the scientific equipment and devices; workers of research (experimental) productions; laboratory assistants who do not have tertiary education.

**Innovatively active industrial enterprises** are enterprises that have been engaged in innovative activities (developed or implemented new or improved products and innovation processes) during a certain period of observation.

**Innovative activity** is activity that aimed at the use and commercialization of R&D results and leads to the release of new competitive goods and services.

**Innovations** are newly created (applied) and (or) improved competitive technologies, products or services, as well as organizational and technical solutions of production, administrative, commercial or other nature, which significantly improve the structure and quality of production and (or) social sphere.

**Innovative products (goods, services)** are the new or improved good, service and/or technology which significantly differs from those existing on the market or creates a new demand and is available for consumption by consumers/users. Innovation products are split into the new for market and the new for enterprise.

**Innovation implementation** implies the putting into service of any new or significantly improved product (good, service) or process, new method for marketing or new organizational method in enterprise activity, organization of work places or external ties.

## SCIENCE AND INNOVATIONS

## INDEX

### A

Abortions 7.15  
Administrative and territorial units 1.3  
Adopted orphans 7.25  
Afforestation by plant 18.59  
Agricultural land 18.8, 18.12  
Agricultural output 18.18–18.29  
Agricultural production 18.1, 18.4–18.7  
Agricultural production index 18.1–18.3  
Animal products supplied for processing enterprises 18.49  
Area 1.1, 27.1  
Area of forest ranges dying 18.62  
Area for agricultural crops (harvested) 18.14–18.16  
Area planted with fruit and berry crops, and grapes 18.17  
Art schools 8.3  
Atmosphere 1.1, 10.4–10.7  
Availability of selected durable goods in households 4.39  
Average annual yield of milk 18.48  
Average distance of transport 21.22, 21.23  
Average monthly pension 4.5  
Average monthly wages 3.20–3.26  
Average monthly nominal and real wages 3.23  
Average weight of one livestock animal 18.47

### B

Banks 12.5–12.7  
Basic indicators for the generation and treatment of wastes 10.8, 10.9  
Basic social and economic indicators 1.4  
Births 2.10–2.17  
Boarding schools 7.24  
Budget 12.1–12.3

### C

Capacity and delivery of energy 16.5  
Capital assets 15.1–15.3  
Capital investment 20.1–20.7  
Capital investment for environmental protection 10.14, 10.15  
Cash benefits (assistance) 7.22  
Centers of social and psychological rehabilitation for children 7.26

## INDEX

---

Children registered with units for preventive activity 9.7

Cinemas 8.1, 8.2

Civil justice 9.8

Climate 1.1

Club-houses 8.1, 8.2, 8.4

Collective accommodation facilities 8.6, 8.7

Collective agreements 3.19

Construction output 19.1–19.3

Consumed nutrients 4.38

Consumer price indices 13.1–13.6, 27.12

Convicted 9.4–9.5

Court convictions 9.4, 9.5

Criminal offences 9.1–9.3

Crude birth rates 2.10–2.17, 27.2

Cultural institutions 8.1–8.4

### D

Deaths (death rates) 2.18

Deaths (death rates) of infants under 1 year old 2.20, 2.21

Deposits by households 12.7

Differentiation of household living standards 4.6

Disabilities 7.17–7.21

Distribution of employees at large, medium, small and micro-enterprises 25.7

Distribution of households by access to the Internet 4.40

Distribution of large, medium, small and micro-enterprises 25.6

Distribution of regular employees 3.22

Distribution of the population by purpose of the Internet services usage 4.41

Distribution of the sold products (good, services) of large, medium, small and micro-enterprises 25.9

Distribution of wage-workers at at large, medium, small and micro-enterprises 25.8

Domestic trade turnover 23.1

Duration of registered unemployment 3.9–3.12

### E

Electronic commerce 24.3, 24.4

Emission of pollutants 10.4–10.7

Employees, regular 3.13–3.15

Employees recruitment and retirement rate 3.16

Employment 3.4, 3.5, 3.8

Energy balance 16.7, 16.8

Enrollment in educational institutions 6.6

Enterprise' balance structure 25.10

Expenditure for environment protection 10.15, 10.16

Expenses for innovations of industrial enterprises 26.7–26.9

Exports of goods 22.2

## INDEX

---

Exports of goods for processing 22.4  
Exports of services 22.6, 22.7

### F

Financial outcome before taxation 1.4, 1.5, 25.11  
Fires 9.10, 9.11  
Foodstuffs consumed 4.32–4.37  
Foreign trade in goods 22.1, 22.3  
Foreign trade in services 22.5  
Forest felling 18.56–18.58  
Forest fires 18.63  
Forest protection 18.63  
Forest and forested area 18.51  
Forestry 18.52–18.65  
Freight shipped 21.1–21.4, 21.8–21.11  
Freight traffic 21.5–21.7, 21.12  
Freight transported 21.13

### G

Gross domestic product 11.1–11.5, 16.2, 27.8–27.10  
Gross regional product 11.8–11.11  
Growth rate (decrease) of industrial production 27.11

### H

Harvested area 18.16  
Health care 7.2  
HIV infections 7.8, 7.9  
Hospital beds 7.5  
Households, by size 4.7, 4.11, 4.13, 4.18, 4.20, 4.25, 4.29, 4.33  
Households with children 4.7, 4.8, 4.11, 4.14, 4.18, 4.21, 4.26, 4.30, 4.34  
Housing stock 5.1–5.5  
Hunting animals 18.50

### I

Imports of goods for processing 22.4  
Imports of services 22.6, 22.7  
Imports of goods 22.2  
Indicators of business entities 25.1  
Indices of basic social and economic indicators 1.5  
Indices of construction output 19.1, 19.3  
Indices of consumer prices for the basic groups of goods and services 13.4  
Indices for capital investment 20.5–20.7  
Indices for passenger transport 21.15  
Industrial injuries 7.16

## INDEX

---

Industrial producer price indices 13.1–13.3, 13.7, 13.8, 27.13  
Industrial production indices 17.1–17.7  
Industrial products sold (goods, services) 17.8  
Infections diseases 7.7  
Innovation activity of industrial enterprises 26.8–26.13  
Input-output at consumer prices 11.7  
Institutions executing sentences 9.6  
Institutions of higher education 6.16–6.19

### L

Labour conditions 3.19, 3.20  
Labour force 3.1–3.3, 3.7, 27.5, 27.6  
Land area 10.1  
Legal persons 14.1–14.4  
Length of transport network 21.20, 21.21  
Libraries 8.1, 8.2, 8.4  
Life expectancy 2.22, 2.23, 27.3, 27.4

### M

Marketable timber produced 18.54, 18.56  
Marriages and divorces 2.24–2.26  
Migration 2.27  
Monetary aggregates 12.4  
Morbidity (incidence) 7.10–7.14  
Mortality 2.18–2.19  
Mortality (death rates) of infants under 1 year old 2.19  
Museum 8.1–8.4

### N

National accounts 11.6  
  
National parks 10.2  
Natural population increase (population crude rate) 2.10  
New capital assets putting into service 15.3  
Number of employees at entities type of economic activity 25.3  
Number of employees, engaged in R&D performance 26.1–26.3  
Number of entities by type of economic activity 25.2  
Number of livestock animals 18.36–18.38  
Number of researchers, engaged in R&D performance 26.4  
Number of wage-workers at entities type of economic activity 25.4

### O

Official exchange rate 12.6  
Out-patient and polyclinic institutions 7.6

## INDEX

---

Output of industrial products 17.9–17.20

Output of agricultural crops 18.19–18.30

Output of animal products 18.40–18.46

### P

Paramedical personnel 7.4

Passenger traffic (turnover) 21.16, 21.17

Passengers transportation 21.13–21.15, 21.18

Pensioners 2.8, 2.9

Physicians 7.1–7.3

Population 2.1–2.7, 27.1

Population, by age group 2.5–2.7

Population, by sex 2.4, 2.6

Population (households), by (money, total) income 4.9, 4.11–4.18

Population income and expenditure 4.1–4.4

Postal items 21.26, 21.27

Pre-school educational institutions 6.1–6.4

Price indices 13.1

Price indices for construction 13.10

Price indices for products sold by agricultural enterprises 13.1, 13.9

Prisoners 9.6

Producer price indices, by selected consumer goods 13.8

Productivity of livestock animals 18.47

Professional educational institutions 6.14, 6.15

Profitability of basic types of agricultural products 18.10, 18.11

Profitability of operational activity 25.12

Publication of books, magazines and newspapers 8.4

### R

R&D performance 26.1–26.5

Realization of forest products 18.53

Religious organisations 1.2

Researchers 26.4

Resident bank loans 12.5

Residential buildings put into operation 19.4–19.9

Retail turnover 23.1, 23.5–23.9

Retail trade of enterprises 23.1, 23.5–23.11

Rolling stock 21.19

### S

Sales of goods (products sold) 23.10

Secondary educational institutions 6.5–6.13

## INDEX

---

Sown area for agricultural crops 18.13–18.15  
Spending for R&D performance 26.1–26.5  
Sports institutions 8.6  
Sports facilities 8.7  
Sports school for children 8.5  
State notary services 9.9  
Stationary pollutant emissions 10.5, 10.6  
Structure of agricultural production 18.4–18.7  
Structure of exports/imports of services 22.7  
Structure of household expenditure by basic consumption expenditure 4.23  
Structure of household money expenditure 4.12–4.15  
Structure of household money income 4.24–4.27  
Structure of household total resources 4.28–4.31  
Structure of production cost of agricultural productions 18.9  
Structure of the consumed fuel 16.3  
Structure of total household expenditure 4.19–4.23

### T

Tariff indices for post and communication services 13.11  
Tariff indices for shipment of cargo 13.12  
Theatres 8.1  
Total fertility rate 27.2  
Tourists 8.9  
Training of postgraduate and doctoral students 6.20  
Transport network 21.20–21.21

### U

Unemployed 3.1, 3.2, 3.7, 3.10–3.12  
Unemployment 3.6, 3.9, 3.16, 27.7  
Unified state register of enterprises and organisations of Ukraine (Business register) 14.1–14.4  
Usage of energy 16.6  
Usage of fuel 16.1, 16.3, 16.4  
Use of information and communication technologies at enterprises of Ukraine 24.1, 24.2  
Use of fertilisers in enterprises 18.34  
Uses of fuel and energy resources 16.3, 16.6–16.8  
Use of employees' working hours 3.17, 3.18  
Utilization of pesticides 18.35

### V

Volume indices for freight shipped 21.4  
Volume indices of gross regional product 11.11  
Volume indices of retail turnover of enterprises 23.5, 23.7

## INDEX

---

Volume of the sold products of entities by type of economic activity 25.5

### **W**

Wages of employees 3.20–3.26, 27.8

Wastes 10.8–10.14

Water (supply, drainage, fresh, recycle) 10.3

Wholesale turnover 23.1–23.4

### **Y**

Yields of agricultural crops 18.30–18.33
