European whey prices moved higher as industry contacts report steady demand for dry whey used in food applications. In contrast, some contacts suggest demand for feed whey may be softening. A few market observers say that more liquid whey is heading into WPI and WPC 80% production due to higher prices for Q4 and Q1 deliveries. As a result, manufacturers are making less dry whey, and inventories of dry whey are tightening.

Prices for: Western Europe, All First Sales, Free on Board - Port, , Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT:	850 - 1,000
---------------------------------------	-------------

Information for the period October 30 - November 10, 2023, issued biweekly
