Dry Whole Milk - U.S.

Report 16 - Released on April 18, 2019

The national f.o.b. spot prices for dry whole milk are mixed as some trades based on specific brands pushed up the bottom price of the range. The national dry whole milk market is very stable as in general, supply is even with its demand. Requests from the confectionery and bakery sectors are fair and slightly improving. Meanwhile, drying schedules for condensed milk are periodic as dry whole milk production is mostly driven by contractual needs. However, at this point, dry whole milk supplies are enough to meet most contract/spot needs.

Prices for: U.S., All First Sales, F.O.B., Conventional, and Edible Dry Whole Milk

Price Range - 26% Butterfat; \$/LB: 1.6200 - 1.6500

Information for the period April 15 - 19, 2019, issued weekly
