Dry Whole Milk - U.S.

Report 18 - Released on May 02, 2019

This week, f.o.b. spot prices for national dry whole are lower. The national demand for dry whole milk is still being fair/good as the confectionary season approaches. Inventories vary from plant to plant across the country. Currently, dry schedules for condensed whole milk are uneven as most balancing plants managers are focusing on converting condensed skim volumes into NDM/SMP. According to several industry participants, the market tone is somewhat unclear at this moment.

Prices for: U.S., All First Sales, F.O.B., Conventional, and Edible Dry Whole Milk

Price Range - 26% Butterfat; \$/LB: 1.5800 - 1.7000

Information for the period April 29 - May 3, 2019, issued weekly
