Butter/Butteroil - Oceania

Report 3 - Released on January 21, 2021

The Oceania butter price range moved up. Regional butter price increases, even with a price range well higher than for Western European butter, speaks to the challenge in producing enough butter to satisfy customers. Most dairy sources in New Zealand attribute strong butter buying to China. Australian exports have slowed, in substantial part due to the exigencies of domestic demand. Some export deals are made with a premium to induce exporters to commit. Seasonally declining regional milk intakes leave buyers disinclined to adopt a wait and see approach to butter buying. Buyers are closing deals to lock in supplies. Contracted volumes are being readily taken.
