Whole Milk Powder - Europe

Report 13 - Released on March 31, 2022

The Western European whole milk powder price range is higher at each end. Demand is strong from within the EU as well as exports elsewhere. This market has historically been geared to responding to orders. That has changed a bit with tight Oceania WMP availability sending some buyers looking toward Western Europe.

WMP conditions are similar to the SMP market: very tight supplies, uncertainty about milk availability, and concern with energy sourcing.

Prices for: Europe, All First Sales, Free on Board - Port, Conventional, and Edible Whole Milk Powder

Price Range - 26% Butterfat; \$/MT: 5,575 - 5,925

Information for the period March 21 - April 1, 2022, issued biweekly

Secondary Sourced Information:

Western European WMP production during January 2022, 7.2 percent from January 2021 according to CLAL data made available to USDA.
