Dry Whey - Western Europe

Report 17 - Released on April 28, 2022

Western European whey prices moved lower at both ends of the price range this week. Industry sources suggest demand for whey is relatively stable, but some propose that a slightly weaker demand for feed whey is removing some of the support for whey prices near the bottom of the price range. Whey production has increased slightly along with seasonal milk flows. Whey inventories, while still tight, have become more available recently.

Prices for: Western Europe, All First Sales, Free on Board - Port, Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT: 1,475 - 1,800

Information for the period April 18 - 29, 2022, issued biweekly

Secondary Sourced Information:

Whey exports from the EU27 January - February 2022, 119,000 MT, decreased 10.7 percent from January - February 2021 according to CLAL data made available to USDA. Main destinations from January - February 2022, the quantity, and percent change from January-February 2021 are China, 26,618 MT, -41.36 percent; Indonesia, 16,782 MT, +13.27 percent; and Malaysia, 10,272 MT, +14.75 percent.
