Dry Whey - Western Europe

Report 19 - Released on May 12, 2022

Western European whey prices moved lower at both ends of the price range. Industry sources suggest the market tone for dry whey is weaker. While demand is present for some food applications, there is less demand overall. Whey production continues to increase as seasonal milk output, and subsequent cheese production, increase. Whey is clearing into contracted orders, and inventories are stable.

Prices for: Western Europe, All First Sales, Free on Board - Port, Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/MT: 1,375 - 1,750

Information for the period May 2 - 13, 2022, issued biweekly
