Dry Whey - Central U.S.

Report 21 - Released on May 26, 2022

Dry whey prices continued to slip this week. Production has increased on steadily available milk supplies into Class III plants. Domestic demand is present, but producers agree that asking prices at and above \$.60 are losing traction as weeks go by. Export demand has slowed down, notably from Chinese customers, as lockdowns have been in place. Although most notes are on the bearish spectrum, other carbohydrates, such as deproteinized whey and permeate, are gaining a little steam in regards to price improvements. Therefore, some contacts suggest at least the potentiality of a floor being reached for sweet whey powder. Animal feed whey prices slipped, on light trading. Whey market tones are unassured, as bears and bulls continue to grapple.

Prices for: Central U.S., All First Sales, F.O.B., Conventional, and Non-Edible Dry Whey
Price Range - Animal Feed; \$/LB: .4800 - .5100

Prices for: Central U.S., All First Sales, F.O.B., Extra Grade & Grade A, Conventional, and Edible Dry Whey

Price Range - Non-Hygroscopic; \$/LB: .4850 - .6400
Mostly Range - Non-Hygroscopic; \$/LB: .5450 - .6100

Information for the period May 23 - 27, 2022, issued weekly
