Whole Milk Powder - Europe

Report 23 - Released on June 09, 2022

Prices for European whole milk powder are steady to higher, moving up at the top of the price range but unchanged at the bottom. Industry sources note that demand for WMP is picking up for deliveries later in the year. End users seemingly want to make sure they have coverage for the coming fall and winter months. In some international markets, prices for European WMP are putting Europe at a competitive disadvantage compared to other suppliers. European WMP inventories are in balance with current orders. Manufacturers are making WMP where they can, mostly to fill current orders.

Prices for: Europe, All First Sales, Free on Board - Port, Conventional, and Edible Whole Milk Powder

Price Range - 26% Butterfat; \$/MT: 5,450 - 5,925

Information for the period May 30 - June 10, 2022, issued biweekly
