Whole Milk Powder - Europe

Report 25 - Released on June 23, 2022

European prices for whole milk powder (WMP) have slid lower on both ends of the price range. Demand for WMP is mixed, and some purchasers are ordering loads to ship in the latter half of the year. Stakeholders say that prices for WMP coming from the EU are higher than loads coming from other countries. This is contributing to softer export demand and putting some downward pressure on prices. Spot inventories of WMP are limited, but in balance with demand. Western European WMP makers are running limited production schedules, and primarily making loads only when needed.

Prices for: Europe, All First Sales, Free on Board - Port, Conventional, and Edible Whole Milk Powder

Price Range - 26% Butterfat; \$/MT: 5,325 - 5,800

Information for the period June 13 - 24, 2022, issued biweekly
