Dry Whole Milk - U.S.

Report 28 - Released on July 14, 2022

Dry whole milk inventories remain lean. Spot supplies are tight. Dry whole milk production is sporadic. Some dairy processing plants with staffing shortages are operating at reduced capacity. Contacts indicate condensed skim drying time tends to take priority over whole milk. Furthermore, heavy milk usage from other Classes is contributing to stymied potential dry whole milk inventory growth in the near term. Domestic demand is fairly flat, and dry whole milk market tones are quietly steady. The national price range is unchanged on limiting trading.

Prices for: U.S., All First Sales, F.O.B., Conventional, and Edible Dry Whole Milk
Price Range - 26% Butterfat; \$/LB: 2.1000 - 2.4500

Information for the period July 11 - 15, 2022, issued weekly
