Dry Whole Milk - U.S.

Report 29 - Released on July 21, 2022

Dry whole milk spot supplies are limited. Inventories are snug, and some manufacturers are not offering full spot loads at this time. Production varies, but output tends to be sporadic and limited. Drying time is reduced at some dairy processing plants; staffing issues limit production capacity, and whole milk drying is generally secondary to condensed skim. Dry whole milk market tones are steadily quiet. Domestic demand is level. The national price range is steady this week on limited trading activity.

Prices for: U.S., All First Sales, F.O.B., Conventional, and Edible Dry Whole Milk
Price Range - 26% Butterfat; \$/LB: 2.1000 - 2.4500

Information for the period July 18 - 22, 2022, issued weekly

Secondary Sourced Information:

EXPORT ASSISTANCE

This week, a cooperative export assistance program accepted requests for export assistance to sell 44,000 pounds (20 metric tons) of whole milk powder. So far this year, the program has assisted member cooperatives with contracts to sell 28.6 million pounds of whole milk powder.
