Dry Whey - Central U.S.

Report 30 - Released on July 28, 2022

Central whey prices slid lower across both the price range and mostly price series. Animal feed whey prices are lower at the bottom of the range but held steady at the top of the range. Most whey is moving through regular contracts, and spot market demand is quiet. While some manufacturers report tight inventories, demand is not overtaking supplies. Whey production is active and in line with busy cheese production. Whey market tones are bearish.
