Dry Whey - Central U.S.

Report 5 - Released on February 02, 2023

Dry whey prices were unchanged across the board. Despite the lack of price shifts, spot market activity and market activity, in general, were not necessarily quiet. In fact, some contacts suggest that some Southeast Asian customers have begun to show more interest, which is a strong bull in what has been a notably bearish market in recent months. That said, some of the early interests are only at prices below the current range, reportedly. Still, domestic end users say they are being offered high protein whey blends at notably lower prices than they were during Q3/4 of 2022. Animal feed whey prices are unchanged. Most off-spec dry whey being traded is moving in the same pocket of middle-high \$.20s. Market tones for Central dry whey are mixed.

Prices for: Central U.S., All First Sales, F.O.B., Conventional, and Non-Edible Dry Whey
Price Range - Animal Feed; \$/LB: .2600 - .3000

Prices for: Central U.S., All First Sales, F.O.B., Extra Grade & Grade A, Conventional, and Edible Dry Whey
