Nonfat Dry Milk - Western U.S.

Report 13 - Released on March 30, 2023

The top of the low/medium heat nonfat dry milk (NDM) price range and both ends of the mostly price series moved lower this week, while the bottom of the price range moved higher. Contacts report spot demand for low/medium heat NDM is light and stakeholders are only purchasing loads to meet their immediate needs. Spot loads of low/medium heat NDM are available for purchasing. Drying operations are steadily producing low/medium heat NDM, amid strong regional milk production. High heat NDM production is limited, as plant managers focus their schedules on the shorter drying times of low/medium heat NDM. High heat demand is steady, and spot inventories remain tight. The high heat NDM price range moved lower at the top, while the bottom was unchanged.
