In the West, low/medium heat nonfat dry milk (NDM) price strength momentum continues with the range and mostly price series increasing at both ends. Domestic demand is stronger. Demand from international buyers is steady. Some traders indicate spot loads are somewhat more available. Production schedules are busy with many NDM manufacturers in the region producing as much as they can. Despite this, some indicate that year-over-year production is down. Manufacturer spot load inventories are generally tight. High heat NDM prices increased. Demand and production schedules are steady.
