In the West, prices for low/medium heat nonfat dry milk (NDM) once again increased at both ends of the range and mostly price series. Bullish price sentiments were heard from stakeholders at a dairy conference held this week. Demand from domestic and international buyers is stronger. Spot load availability is tight. Low/medium heat NDM production schedules are stable and generally given more priority than dry buttermilk production for available open drier times. High heat NDM prices increased as well. Production schedules and demand are steady.

Prices for: Western U.S., All First Sales, F.O.B., Extra Grade & Grade A, , Conventional, and Edible Nonfat Dry Milk
