The price range and mostly price series for dry whey did not change this week in the Central Region. Demand for dry whey is steady. Contacts mention demand for some products with higher specifications is strong and difficult to find, while other products with lower demand are readily available. Manufacturers continue to prioritize higher protein concentrates over Grade A and Extra Grade whey as whey protein concentrates and isolates continue to see rising prices, limiting production of dry whey in some areas. Reported sales of dry whey are lighter this week. Animal feed whey production is light, contributing to tight inventories. Demand for animal feed whey is limited and prices are unchanged.

Prices for: Central U.S., All First Sales, F.O.B., , Conventional, and Non-Edible Dry Whey

Price Range - Animal Feed; \$/LB: .3500 - .3800
