In the West, the low/medium heat nonfat dry milk (NDM) prices moved slightly higher at the bottom end compared to the bigger decrease at the top end of the range this week. Both ends of the mostly price series decreased. Domestic demand varies from steady to somewhat stronger. Demand from international buyers varies from lighter to steady. Production schedules are mixed. For some manufacturers low/medium heat NDM production is steady and busier than skim milk powder production. For other manufacturers, dryer time is being split between low/medium heat NDM, whole milk powder, and skim milk powder production. High heat NDM prices decreased at both ends of the range. Production schedules and mixed. Demand varies from moderate to stronger.
