\* These reports contain data based on voluntary direct reporting from manufacturers. Retrospective adjustments are possible if new or revised data is received.

\*\* Please note that this report contains material revisions to previously published 2021/22 data, especially in relation to cheese production. The errors contained in the originally-released data were the result of an incorrectly specified report provided to Dairy Australia. The issue has now been resolved, and we thank our data-sharing partners for their efforts and continued support.

\*\*\* Dairy Australia estimates this collection covers over 75% of milkfat production (butter and AMF), over 75% of powder production (SMP and WMP), over 90% of cheese production and over 95% of whey production (whey powder).
